at North Puyallup

— VISITORS ALWAYS WELCOME —

WE ARE SPECIALISTS

in any and all types of

Hardy Perennials

For Rockeries, Cut Flower Work, Borders
Naturalizing

and all other uses to which this popular class may be put.
We have endeavored to secure as wide a selection of this
class as possible.

We have access to one of the finest collections of
Western Natives. If you wish plants of any of these
which we do not list we can supply them at reasonable
prices. We take a pardonable pride in submitting the
following list of plants for it is the culmination of fifteen
or more years of effort.

We can also furnish many of the so-called commercial
varieties not listed.

1935 - 1936

General Information

HOW TO ORDER

Whenever possible it will be greatly appreciated if you will mail us your orders early. It will greatly facilitate handling orders in rush season, and will enable us to send you larger plants and more certainly will not be obliged to substitute. All orders, no matter when they are received, will be given prompt and personal attention. Use our order blanks whenever possible. Keep the seed and plant items separate on the order. **GIVE YOUR FULL NAME AND COMPLETE MAILING ADDRESS.** Give the quantity and price of each item. You may order by catalog number alone if you prefer; however, it is much better to give the full name as well in order to avoid any possible errors. We strongly urge that you keep a copy of your order.

OUR GUARANTEE

We guarantee plants and seeds to arrive in good growing condition. Every effort has been made to give the full and correct botanical name as given by the best authorities. Of course in some items such as Sedums, Saxifrages, and Pentstemons we cannot absolutely guarantee the name as even the best authorities are in confusion. However, we do guarantee them to be true to description. Heights given are of plants when in full bloom, in ordinary good garden soil under normal conditions. We have endeavored to bring to you as complete a list of hardy Perennials and Biennials as possible. All items are perennial and hardy in this locality unless otherwise noted.

POSTAGE

All orders for seed alone will be sent post paid. Plant orders for \$1.00 or more will be sent postpaid in Zones 1 and 2. Zone 3 add 10%; zone 3, 15%; zone 5, 20%; zone 6 and further add 25%, to cover postage and packing expense. If in doubt as to your zone inquire of your postman.

QUANTITIES

We can file any orders no matter how large or small.

All 20c items six for \$1.10; \$2.00 a dozen.

All 25c items six for \$1.30; \$2.50 a dozen.

All 30c items six for \$1.70; \$3.00 a dozen.

All 35c items three for \$1.00; \$3.50 a dozen.

More expensive plants at the each rate only. To obtain dozen rates, plants in each group must be the same variety. For 100 plants figure seven times the dozen rate. Write us for quotations on more than 100 plants.

C. O. D. ORDERS

We can not accept C. O. D. orders unless accompanied by 25% cash.

REMITTANCES

May be made by Postal Money Order; Personal Check; or stamps if in small amounts. If enclosing currency, for your own safety register the letter.

QUALITY

All plants are strictly Washington No. 1 grade field grown specimens, one or more years in age, and individually labeled. **SATISFACTION GUARANTEED.**

SUBSTITUTIONS

While we endeavor to grow sufficient quantities of each variety to meet the demand, we can not outguess the public nor the weather. We will make no substitutions unless your permission is given. If permission is given we will send your second choice item if given; if not, we will substitute a similar variety.

COMPLAINTS

As you can depend upon our plants and seeds, you can also depend upon our integrity. We will at all times make reasonable adjustments of your claims. Your

orders are executed by one who is personally interested in giving you the best obtainable. Nevertheless mistakes occasionally occur, and if you will write us as soon as the mistake is noticed we will take steps to correct it. We are always at your service to help you in any of your gardening problems.

DELIVERIES

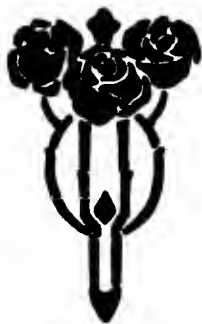

Shipments can be made to points in Western Oregon and Washington any time from September First to June First on most items. For Eastern and Northern points shipments should be made in September or first part of October; last half of March, April, and May. We will of course ship at any other season if so requested but only at the customer's risk. Unless special delivery dates are given we will ship to you at the time best suited to your locality.

For large shipments we suggest express C. O. D.

VISITORS WELCOME

Visitors are always welcome to our nursery. Visitors coming from Tacoma or points south, after arriving in Puyallup, cross the OLD bridge over the Puyallup River at fifth street. As soon as you are across you come to a gravel road going upstream. The nursery is located about $\frac{1}{4}$ mile up this road on the right.

Visitors coming from Seattle and points north if coming via the new Seattle-Tacoma Highline, turn off at Fife, proceed to Puyallup, and then follow the above instructions. If coming via the old highway stay on this road to about one mile past the Sumner cemetery. On the right hand side is a gravel road leading off at right angles with a sign Boatman Road. Follow this road around the bend and the nursery will be on the left. If this road is missed you may continue to North Puyallup then turn on the pavement toward Puyallup till you come to the foot of the old bridge and then turn left and proceed about $\frac{1}{4}$ mile.

Here is your chance to win some plants

Any One Is Eligible

A picture (photograph) of any unusual perennial sent with an order of \$1.00 or more will entitle you to 50c in trade for any plant listed in our catalog; also, having a chance to compete in the grand prize for the best picture sent during the year from October 1, 1935, until August 31, 1936.

First Prize

**Fifteen Dollars worth of Plants sent prepaid.
Plants of your own selection.**

Second Prize

Ten Dollars worth of Plants.

Third Prize

Five Dollars worth of Plants.

Five Prizes at \$2.50 and 25 Prizes worth \$1.00 each.

Just send a good clear photograph of any perennial. They will be judged upon the unusualness of the subject as well as clearness. Pictures of rockeries may be sent.

All pictures sent will become the property of VAN'S PERENNIAL GARDENS and may be used in any way they see fit.

Any photograph not accompanied with a \$1.00 order will be eligible in the contest but will not receive the 50 cents in trade. You may submit as many pictures as desired.

HARDY PERENNIALS

and Rockery Plants

ACAENA

1001. *Glauca*—This evergreen trailer with bluish hue is excellent for carpeting and rock steps. Each 20c, 3 for 50c

ACANTHUS

1002. *Latifolius*—"Bear's Breech." This is the plant that the Ancient Greeks used for their famous architectural designs. It has beautiful large shiny dark green foliage; grows about 30" in height. Each 20c, 3 for 50c

ACHILLEA

1003. *Ageratum*—A useful border plant with large corymbs of golden yellow blooms and strongly scented foliage. Each 15c
1004. *Aurea*—Grey downy foliage with flat umbels of golden flowers; height about six inches. Each 25c
1005. *Clavennae*—Profusion of white flowers on dwarf silvery gray foliage. An excellent plant for the gray garden. Each 15c
1006. *Crimson Beauty*—An excellent border plant growing about 40". Each .. 15c
1007. *Millefolium Roseum* — Finely cut dark green foliage with bright pink flowers. 24". Each 15c
1008. *Ptarmica*—"The Pearl"—Pure double white flowers; excellent for bouquets. Each 15c, 3 for 40c

ACONITUM—"Monkshood"

1009. *Fischerii*—Pale blue flowers on two foot stems during September and October. Each 20c, 3 for 50c
1010. *Napellus*—36" very dark blue; deeply cut foliage. Each 20c, 3 for 50c
1011. *Pyramidalis*—60" One of the prettiest of the Aconites. Very large medium blue and white flowers. Each 25c
1012. *Sparksii*—36" Vivid blue and white. Each 20c, 3 for 50c
1013. *Wilsonii*—Large violet or dark blue flowers on 6 to 8 ft. stems from September to November. Each 20c
- Note: All Aconitums like shady situations, preferring very rich soil.

ACUBA

1014. *Japonica*—A form of laurel with golden spotted foliage. Each 15c, 3 for 40c

AEGOPODIUM

1015. *Podograria*—"Goat's Foot"—This is an excellent ground cover; variegated foliage. Each 15c

AETHIONEMA

This family is excellent for alpine gardens, especially for hot, dry locations. Their flowering periods from May to July.

1016. *Armenum*—A neat compact plant, 3 to 4 inches high with many crowded blue-grey leaves short and pointed. The pink flowers are charmingly veined. Each 25c
1017. *Grandiflorum*—Forms a loose bush of 12 inches or more, with long blunt blue-grey leaves. The flower spikes are loose and lovely, the flowers being pink and the largest of the race. Each 35c
1018. *Persicum*—6" A gem for the rockery with light rose flowers and blue-grey leaves in the early spring. Each 20c
1019. *Pulchellum*—4" Rose purple flowers on prostrate branches. Each 20c
1020. *Warley Rose*—Makes compact bush-lets 4 to 6 inches high, covered with bright rose pink florets, resembling a small *Daphne Cneorum*. Each 50c

AGROSTEMMA

1021. *Coronaria Atrosanguinea* — "Mullein Pink or Rose of Heaven"—Deep blood red flowers growing 28 inches in height. Each 15c
1022. *Flos-Jovis* — "Lychnis Flos-Jovis"—Grows about 16 inches, bearing bright carmine rose flowers. Each 15c

AJUGA—"Bugle Weed"

1023. *Genevensis*—Attractive green foliage and bright blue flowers. Each 15c
1024. *Metallica Crispa*—A rare form, very compact, with crinkly leaves of a deep green color, shaded with a

metallic hue. For a moist shady spot.

Each 40c

1025. *Reptans Rubra*—An excellent fast growing carpeter with richly bronzed purple leaves with dark blue flowers on six inch stems. Each 15c

ALLIUM

Alliums are excellent for the border, the rockery, or the wild garden. The hardy bulbs are very long-lived.

1026. *Cernuum*—Very pretty graceful open clusters of nodding pink flowers. Each 15c
1027. *Moly Luteum*—Blooms very early in the spring; bright yellow flowers flowers eight inches in height. Each 15c
1028. *Pulchellum*—Larger than the above with loose clusters of purplish-red blooms in July and August. Each 15c

ALSINE

1029. *Pinifolia*—A delightful dwarf for the rockery, covered with miniature white blooms in the spring. Each 20c

ALSTROMERIA

1030. *Aurantiaca*—"Peruvian Lily"—Needs slight protection, moist soil, and semi-shade. It has bright orange flowers spotted red. Makes an excellent long keeping cut flower and is indispensable in the border. Each 25c

ALYSSUM

1031. *Alpestre*—Early light yellow flowers; with gray foliage, 3 to 4 inches. Each 20c
1032. *Argenteum*—Silvery foliage and large panicles of yellow flowers on 15 inch stems, following *Saxatile* in bloom. Each 20c
1033. *Idaeum*—Prostrate habit, silvery foliage, and soft yellow flowers blooming all summer. Rare. Each. 35c
1034. *Moellendorffianum*—4" Bright yellow. Each 20c
1035. *Rostratum*—8" A trailing type with an abundance of golden yellow blooms. Each 20c
1036. *Saxatile Compactum*—6" The ever popular "Basket of Gold." Each 15c
1037. *Saxatile Fl. Pl.*—Double flowering form of the above, the double flowers

giving a richer appearance to the bright yellow. Plants bloom freely from May to November. Each 50c

1038. *Serpyllifolium*—A form of *Alyssum Alpestre*, from Spain; very small attractive creeper with pale yellow flowers. Each 25c
1039. *Spinosum*—Woody stemmed, dense spiny foliage with abundance of white flowers during June and July. Each 25c
1040. *Spinosum Roseum*—Pale pink form of *Spinosum*. Each 35c

AMPELOPSIS

1041. *Virginiana*—Virginia Creeper—An excellent rapid growing hardy vine. Each 20c

ANCHUSA

1042. *Barrelieri*—36" Bushy habit; very early small deep blue flowers, like the Forget-Me-Not. Each 20c
1043. *Italica Dropmore*—Can not be too highly recommended for background plant. Gentian blue flowers lasting all summer. 5'. Each 15c
1044. *Italica Lissadel*—A dwarfer form of *Dropmore*, of a rich blue. Each 15c
1045. *Italica Sutton's Dwarf Blue*—24" A new variety of unusual merit. Each 20c

- * * * * *
- * 1046. *Myosotidiflora*—This shade lov- *
 * ing plant is very different from the *
 * other *Anchusas*, as it has large heart- *
 * shaped leaves and bright blue forget- *
 * me-not like flowers in early spring; *
 * growing about 15". Each 25c *
 * * * * *

ANDROSACE

This genus should be represented in every alpine garden. They are hardy, but require special treatment. They require a deep cool soil, well drained.

1047. *Carnea Lageri*—Compact rosettes of dark green foliage, and umbels of bright pink flowers on 2 to 3 inch stems. May and June. Each 50c
1048. *Lanuginosa*—One of the most beautiful and floriferous with silver foliage and soft rosy lilac blossoms. Should be allowed to trail over a rocky ledge. Each 25c

1049. *Primuloides*—Rosettes of silky foliage and heads of rosy lilac flowers on four inch stems. It is very similar to *Sarmentosa*. Each 25c
1050. *Sarmentosa*—Spreading masses of silvery foliage carrying goodly sprays of soft pink flowers. 4 in. Each 25c

ANEMONE

This family can not be beat for beauty in the alpine garden, being of easy culture and enjoys full exposure to sun and air. The bulbous varieties should be planted in the fall, however, they can be set out in growth.

1051. *Appenina*—Exquisite blue blossoms in the early spring, many rayed stars, on 3 to 6 inch stems. Dormant tubers in fall. Each 25c
1052. *Blanda*—Neater, dwarfer and fleshier leaved than *Apennina*, with larger flowers of fine soft blue with golden centers. Each 35c
1053. *His Excellency*—12" Large cups of most intense vivid scarlet, in the spring. Each 25c
1054. *Hupehensis*—Native of Hupeh, China, it is like the *Anemone Japonica*. Bears rosy mauve flowers on 12 to 18 inch stems, from August to October. Each 25c
1056. *Pulsatilla Rubra*—A deep red form of *Pulsatilla*. Each 35c
1057. *St. Brigid*—The favorite spring blooming *Anemone* in a variety of colors. Each 20c
Dormant tubers in fall. Each .. 10c
1058. *De Caen*—Similar to *St. Brigid* except that it comes in more single forms. Each 20c
Dormant tubers in fall. Each .. 10c

* * * * *

- * 1059. *Sylvestris*—The Snowdrop Anem- *
* one—is a woodlander that ranges from *
* central Europe down the west coast of *
* Africa. It fits well into the larger *
* growths of the rock garden. Unlike *
* the others, this one has a vigorous, *
* creeping root-stock. Among the leaf- *
* age, the flowers stand sedately on *
* eight to twelve inch stems, one and a *
* half inches across, very white and *
* fragrant. It likes RICH mold and *
* shade, but it will endure much less. *
* Each 20c, 3 for 50c *
* * * * *

1055. *Pulsatilla*—"Pasque Flower"—Large flowers varying in color from deep lavender to violet purple, with golden yellow stamens. It is very attractive also when in seed, as its pods are feathery and they sway with the breezes. Each 25c

ANEMONE JAPONICA

1060. *Alba*—Large waxy white flowers. Each 25c
1061. *Alice*—As the flower buds expand, the shell-like silvery rose petals become suffused with bright carmine. Each 25c
1062. *Louise Uhink*—Large double white flowers. Each 25c
1063. *Queen Charlotte*—Large semi-double flowers of pink and white. Each 20c
1064. *Richard Arends*—Large white with lilac or pink tint. Each 35c
1065. *Rosalie*—Deep rose; September to October. Each 20c
1066. *Rubrum*—Semi-double rosy red flowers. Each 25c
1067. *Whirlwind*—Semi-double. White. Each 25c

NOTE—All forms of *Anemone Japonica* bloom in the fall. They are excellent for cut flowers.

ANTHEMIS

1068. *Kelwayi*—Golden yellow flowers blooming all summer; finely cut foliage. Each 15c

AQUILEGIA

The Columbines are of very easy culture and yet no flower exceeds their airy grace and generosity of blooms, which make excellent cut flowers.

1069. *Alpina*—Nodding flowers of various shades of blue; short spurred. Each 25c
1070. *Coerulea*—Rocky Mt. Blue. 36". Each 15c
1071. *Blue Hybrids*. Long spurred. Ea. 15c
1072. *Chrysantha*—yellow. Long spurred. Each 15c
1073. *Copper Queen*. Long spurred. Ea. 15c
1074. *Crimson and Gold*—Sutton's Long-spurred variety. Each 15c

* * * * *
 * 1075. **Crimson Star**—The most beauti- *
 * ful of the hybrid Columbines. Rich red *
 * spurs with white corolla. It is quite a *
 * sensation in England. Its height is 24 *
 * inches. Each 20c *
 * * * * *

1076. **Dobbie's Imperial Hybrids**—this is a popular strain, which has a wide variety of rich and pastel tints in extra long spurred perfectly formed flowers. Each 20c

1077. **Farquhar's Pink**—Delicate pastel pink shades. Each 15c

1078. **Jaetschaui**—Large orange flowers with long red spurs. Each 15c

1079. **Mrs. Nicholls**—Sutton's improved Rocky Mt. Blue. Each 20c

1080. **Orange and Scarlet**. Each 15c

1081. **Oxysepala**—Large blue flowers with white or yellow centers. Each 25c

1082. **Rose and Scarlet**. Each 15c

1083. **Scott Elliott**—A splendid assortment of long-spurred giants. Each ... 15c

ARABIS—Rock Cress

1084. **Albida Fl. Pl.**—Very early masses of double white flowers which make excellent cut flowers. Each ... 20c

1085. **Albida Roseus**—Single light rose flowers. Each 15c

1086. **Albida Variegata**—Foliage edged with light yellow or white. It is very attractive the year around if planted in poor soil. Each 15c

1087. **Kellereri**—Very dwarf, compact tufts of somewhat silvery foliage with white flowers on 2 to 3 inch stems. Each 25c

ARCTOSTAPHYLOS

1088. **Uva-Ursi**—Kinnikinic or Bearberry—Very valuable for dry rocky or sandy banks, as it is prostrate, shrubby, with dark shiny green foliage and white flowers, followed by orange red berries. Each 25c

ARENARIA

1089. **Verna**—Stepping Stone Moss— $\frac{1}{2}$ " Mats of deep green moss. Can be walked upon without injury to the plant. Each 20c

1090. **Verna Aurea**—Grassy-like tufts and mats of golden yellow. Each .. 35c

1091. **Purpurascens**—Unique in having

rosy-lilac flowers which hide the mats of glossy foliage from May to July. 2 inches. Each 35c

ARMERIA

1092. **Caespitosa**—Diminutive tufts of dark green spiny leaves, studded with almost stemless heads of pink flowers. Each 50c

1093. **Formosa**—Giant Thrift—18 inches. Varying shades of pink. Each 15c

1094. **Lauchiana**—The common "Thrift" or Sea Pink. It is excellent for low borders, or rockeries. Each ... 15c

1095. **Lauchiana Nana**—Dwarf clear deep pink flowers. Each 15c

1096. **Lauchiana Nana Alba**—Dwarf white form of above. Each 20c

1097. **Lauchiana Nana Red**. Each ... 20c

1098. **Mauritanica**—Intermediate between *Lauchiana* and *Formosa*. Each 20c

ARNICA

1099. **Montana**—12" gray foliage, large tassels of yellow flowers; very rapid growing.

ARTEMESIA

1100. **Glacialis**—Tiny compact fluffy plant with yellow flowers,, 4 to 5 inches. Each 25c

1101. **Lactiflora**—"Hawthorne Scented Mugwort"—60". Creamy white flowers in the fall; excellent for cuts. Also, is fine for background plant. Each 15c

1102. **Silver King**—Ghost Plant—Beautiful silver foliage; can be cut and dried. Each 20c

ASARUM

1103. **Caudatum**—For moist shady places, this plant makes an excellent ground cover. It has dark evergreen heart shaped leaves. Each 20c

ARUNCUS

1104. **Aruncus**—This is a native form of *Spirea*. The sprays of creamy white flowers grow about four feet, They like shade.

ASCLEPIAS

1105. **Tuberosa**—"Butterfly Weed"—Very vivid orange flowers on 18 inch stems, from July to September. For hot dry locations. Each 20c

ASPARAGUS

1106. *Chinensis*—This plant grows about five feet tall, and has beautiful palm-like foliage. Each 15c

ASPERULA

1107. *Cyananchica*—Trailing plant of grassy foliage, and fine delicate pinkish flowers in profusion. Can be used in place of Baby Breath. Ea. 20c
1108. *Hexaphylla*—An excellent early substitute for white baby breath. Grows about 3 feet. Each 15c
1109. *Hirta*—4 inches. Clusters of dainty rosy white flowers. Each 15c

ASPHODELUS

1110. *Luteus*—This is the plant from which the Daffodil originally received its name. It is sometimes called the King's Spear. Very odd spikes of yellow bloom, and attractive grassy foliage. Each 15c

ASTER

1111. *Alpinus*—Early light lavender blooms on eight inch stems. Fine for rockeries. Spring. Each 15c
1112. *Apinus Dark Beauty*—Large deep lavender blooms on 6 inch stems. It is much superior to *Alpinus*. Ea. 20c
1113. *Alpinus Subcoerulus*, *Star of Eisanach*—Bright lavender and lavender blue flowers with golden centers are borne on 15 inch stems from May to July. The flowers are from 3 to 4 inches across. Each 25c
1114. *Alpinus Subcoerulus*, *Wartburg Star*—Large violet blue flowers on 12 to 15 inch stems, blooming from May to July. Each 25c
1115. *Amellus King George*—Wide bushes with a profusion of large blue flowers in midsummer. About 2 feet. Each 35c
1116. *Amellus Rudolph Goethe*—Large lavender blue flowers about 18 inches blooming from August to October. Each 35c
1117. *Forresti*—Very dwarf and compact, the flowers are extra large for the size of the plant. purplish-violet with an orange yellow disc on 5 inch stems. Each 50c
1118. *Foliaceus*—Large lavender flowers on 12 inch stems. Thrives anywhere,

but best in a rich moist soil. Flowers from June to Sept. Each .. 35c

New Hybrids are of strong and vigorous growth and easiest culture. They are valuable for edging or grouping in front of borders, as well as being attractive in the alpine or rock garden. Flowering period extends from August to October. We offer the following:

1119. *Nancy*—A beautiful dwarf with masses of lavender pink flowers on 9 inch stems. Each 50c
1120. *Ronald*—Slightly taller, with a profusion of showy rose-pink buds, which open a lilac pink. Each .. 50c
1121. *Victor*—The dwarfest of the hybrid asters, growing only six inches. The flowers are large and of a clear pale lavender blue. Each 50c
1122. *Hybridus Luteus*—An excellent cut flower, as it blooms from July to October if kept cut. Clusters of small bright yellow flowers on 18 inch stems. Each 35c
1123. *Mauve Cushion*—Forms round cushion-like plants, 2 to 3 feet across and from 6 to 8 inches high. It is completely covered with pale mauve-colored flowers during October and November. Each 25c

ASTERS—Fall Flowering, or
Michaelmas Daisies

1124. *Acris*. Each 20c
1125. *Amos Perry*. Each 20c
1126. *Mrs. F. W. Raynor*—Belongs to the *Novae-Angliae* section. Flowers are almost red, or intense violet-purple. 4½ feet. Each 25c
1127. *Grey Lady*—Of the *Novi-Belgi* sections, grows about 4 feet with large well shaped flowers of a delicate French grey. Each 25c
1128. *Little Boy Blue*—Of the same group as *Grey Lady*, is the finest rich blue aster ever introduced. Very compact, not growing over 2 feet high, blooming from early August to October. Each 25c
1129. *Climax Lavender*—6 feet. The common type of *Michaelmas Daisy*. Each 15c
1130. *Climax White*—5 feet. Pure white form of the above. Each 15c

1131. Feltham Blue—6 feet. Fine lavender blue. Each 15c
1132. Maggie Perry—4 feet. Semi-double purplish-mauve. Each 15c
1133. Pink Beauty—2 feet. Clear pink flowers in profusion; late August. Each 15c
1134. Pink Wonder—5 feet. Medium late. Each 15c
1135. Ryecroft Purple—6 feet. Gray foliage; large purple flowers. Each 20c
1136. Ryecroft Red—6 feet. Purplish red form of the above. Each 20c
1137. White Star—4 feet. Masses of dainty tiny white flowers. Each 15c
- 1137C. One each of Mrs. F. W. Raynor, Grey Lady, and Little Boy Blue, for 60c
- 1137CC. One each of Climax Lavender, Maggie Perry, and Pink Beauty, for 30c

ASTILBE

1138. America—Beautiful pink plumes with a bluish caste. Excellent for cut flowers. Grows about 3 feet. Ea. 20c
1139. Chinensis Pumilla—A very dwarf type with spikes of rosy mauve flowers on 12 inch stems. Each ... 50c
1140. Davidii—A handsome plant from China, flowers rose-violet, in large plumes 6 feet. Astilbes are excellent plants for shade. Each .. 20c
1141. Queen Alexandria—2 feet Light salmon pink. Each 20c

AUBRETIA

This group is one of the most valuable for the alpine garden or rock walls. They bloom from early Spring and throughout the summer. Their vivid colorings lend charm to any garden.

1142. Crimson King—A purplish crimson. Each 35c
1143. Dr. Mules—A very profuse bloomer with violet purple flowers. Ea. 50c
1144. Eyrii—Large light violet blooms. Each 20c
1145. Gracea—Bright lavender blue. Ea. 20c
1146. Large Flowered Hybrids—Finest mixture obtainable. Each 15c
1147. Mrs. Lloyd Edwards—Choice new crimson shaded with violet. Each 35c
1148. Purple King—Large flowered deep purple. Each 25c
1149. Rosea Grandiflora—Clear pink.

- Each 20c
1150. Variegated—Yellow and green foliage with purple blue flowers. Each 35c
1151. Whitewall Gem. Bright purple. Ea. 15c
- 1151C. One each of the Aubretias for \$2.35

AURICULA

See Primula

BAHIA—Syn. ERIOPHYLLUM CAESPITOSUM

1152. Lanata—12 inches. Wonderful showy plant with gray foliage and golden yellow flowers. Each 15c

BAPTISA

1156. Grandiflora—2 feet. Very attractive bright green foliage with Lupin like flowers of a deep indigo blue in midsummer. It is sometimes called "False Indigo." Each 15c

BELLIS

1154. Integrifolia—A mass of white daisies tinted lavender, blooming all summer. Height 10 inches. Each .. 15c

BELLIUM

1155. Minatium—2 inches. Very dainty miniature white daisies; excellent for the rock garden. Summer. Ea. 20c

BETONICA

1156. Grandiflora—2 feet. Very attractive dark green foliage, with beautiful heads of red purple flowers. Ea. 20c

BIDENS

1157. Atrosanguinea—15 inches. "The Black Dahlia." This plant needs slight protection. It bears attractive maroon black flowers in profusion. Each 20c

BOCCONIA

1158. Cordata—5 feet. "Plume Poppy." This plant has attractive large glaucous sinuate foliage; panicles of cream white flowers in the fall. Each 20c

BOLTONIA

1159. Latisquama—6 to 8 feet. Makes an excellent background plant. It has large mauve pink daisies in early fall. Each 20c

CACALIA

1161. Aurea—18 inches. A rapid growing summer blooming plant with vivid burnt orange tassels. Each .. 15c

BUPHTHALMUM

1160. Speciosum Cordifolium—3 to 4 feet. Large tropical leaves and huge orange-yellow daisies. Summer. Ea. 20c

CALAMINTHA

1162. Alpina—6 inches. "Alpine Mint," a very pretty dwarf plant with purple flowers in the spring. Each 20c
1163. Corsica—Larger flowered and earlier than Alpina. Each 20c

CALANDRINA

1164. Umbellata—12 inches. This gray foliage plant is rather difficult to establish but is well worth the trouble. It is ideal for the rockery, blooming all summer with masses of vivid magenta. Each 25c

CALLIRHOE

1165. Involucrata — 6 inches. "Creeping Mallow." The long runners do not root at every joint. The large showy crimson cups appear during July and August. Each 20c

CALCEOLARIA

1166. Polyrhiza—A creeper with bright yellow flowers on 6 to 8 inch stems from June to August. Each .. 50c

CALTHA

1167. Palustrias—"Marsh Marigold"—Does its best in damp places, or around the pool in either sun or shade. Bright yellow flowers on 10 inch stems. Each 25c

CAMPANULA—Dwarf Species

No genus contributes as much to the Alpine garden as does the Campanulas. They are of easy culture, preferring a little shade, and good drainage. Their flowering period varies from early May to November.

1168. Abietina—On 12 inch stems are wide open stars of violet, above mats of narrow-leaved bright green rosettes. Each 25c
1169. Barbata — Pendulous silvery - blue

bearded bells on 10 inch stems, blooming from May to July. Ea. 20c

1170. Carpatica—Wide tufts of pretty green foliage with open upright bells of blue on 8 inch stems. Very easily grown. Each 20c

1171. Carpatica Alba — White flowering form of the above. Each 20c

NOTE—The variety Carpatica is very often confused with Turbinata.

1172. Collina—Satiny deep purple bells on 9 inch stems. Each 50c

1173. Fragilis—A fine trailer with wide open bells of soft blue. Each .. 35c

1174. Garganica — Glossy green foliage, covered with an abundance of light blue, star-shaped flowers, with a small white eye. Each 25c

1175. Glomerata Acaulis—Form a dwarf and compact plant with large clusters of rich violet upright bells on 3 to 6 inch stems, from May to August. Each 25c

1176. Glomerata Superba—Grows about 18 inches in height with flowers about the same as Acaulis, only it does not bloom as long. Each 15c

1177. Isophylla Alba—A beautiful trailing plant with large white saucer-shaped flowers, Aug. to Oct. Each 35c

1178. Lasiocarpa—This Japanese species makes neat rosettes of shiny toothed leaves with upright powder blue flowers on 3 inch stems. Each .. 75c

1179. Muralis—Is a good companion to Garganica. Its flowering period is from June to November. Purple-blue bell shaped flowers on 6 inch stems. Each 25c

- * * * * *
* 1180. Poscharskyana—If this plant is *
* cut back after each blooming period it *
* blooms from May up to freezing pe- *
* riod. It is a trailing plant related to *
* C. Garganica, with far-reaching pros- *
* trate sprays of gray-blue starry flow- *
* ers which are 1¼ inch or more across. *
* Each 35c, 3 for 90c *
* * * * *

1181. Pulla — Drooping bells of shining deepest purple blue or russet-purple, on 2 to 3 inch stems. Each .. 25c

1182. Pusilla—Is very similar to Bellardi-Miranda. Nodding bells of lavender blue flowers about 4 inches high. June to August. Each 20c

1183. *Raddeana*—Glossy scalloped leaves with branching sprays of large violet bells on 10 inch stems from June to August. Each 25c
1184. *Rhomboidalis* Fl. Pl.—Similar to *Carpatica*, but double and somewhat more dwarf. Each 50c
1185. *Rotundifolia*—"Blue Bells of Scotland" Each 20c
1186. *Sarmatica*—Many spikes of pale blue bells. Each 35c
1187. *Turbinata*—Erect cup-like flowers; varying shades of blue and lavender; or white. Each 15c
1188. *Velutina*—12 inches. White spikes of dainty white bells. Each 20c

CAMPANULA—Border Plants

- Canterbury Bells—Cup and Saucer type.
1189. Blue, Pink, Lilac, or White. Each 15c
- 1189C. One each of the colors for ... 50c
1190. Single Blue, or Rose. Each 15c
1191. Double Blue, or Rose. Each ... 15c
- 291C. One dozen Canterbury Bells for \$1.50
1192. *Persicifolia*—"Peachleaf Bellflower"—Dark green foliage, with single blue bells on 3 ft. stalks. Often called the perennial Canterbury Bell. Each 15c
1193. *Persicifolia Alba*—The white form of the above. Each 15c
1194. *Persicifolia Moerheimi*—Large pure double white bells, much superior to the single form. Each 20c
1195. *Persicifolia Pfitzeri*—Large double blue flowers, very beautiful. Ea. 25c
1196. *Persicifolia Double French Grey*. Each 20c
1197. *Persicifolia Telham Beauty Seedling*—Very large single china blue bells on 3 to 5 foot stalks. Each .. 20c
1198. *Pyramidalis*—"Chimney Bellflower"—Porcelain blue flowers in a perfect pyramid 5 to 6 feet. June to September. Each 25c
1199. *Tracheium*—3 feet. "Coventry Bells." Single mauve blue drooping bells. Each 15c
- 1199C. One each of the *Persicifolia Campanulas* for 75c

CANDYTUFT

(See *Iberis*)

CARLINA

1200. *Acaulis*—4 inches. An attractive

dwarf for dry hot situations. Ornamental foliage with silvery thistle like heads. Each 20c

CARNATIONS

These carnations are raised from seed, and cannot be relied to be 100% true, or double. However, either single or double they make a wonderful showing. They are perfectly hardy, and with disbudding and fertilizing can be as large a flower as the greenhouse type. They come between 80 and 90% double. The flowers are very strong scented of cloves.

As they are such large plants, it would be advisable to allow about 10% extra postage than ordinarily.

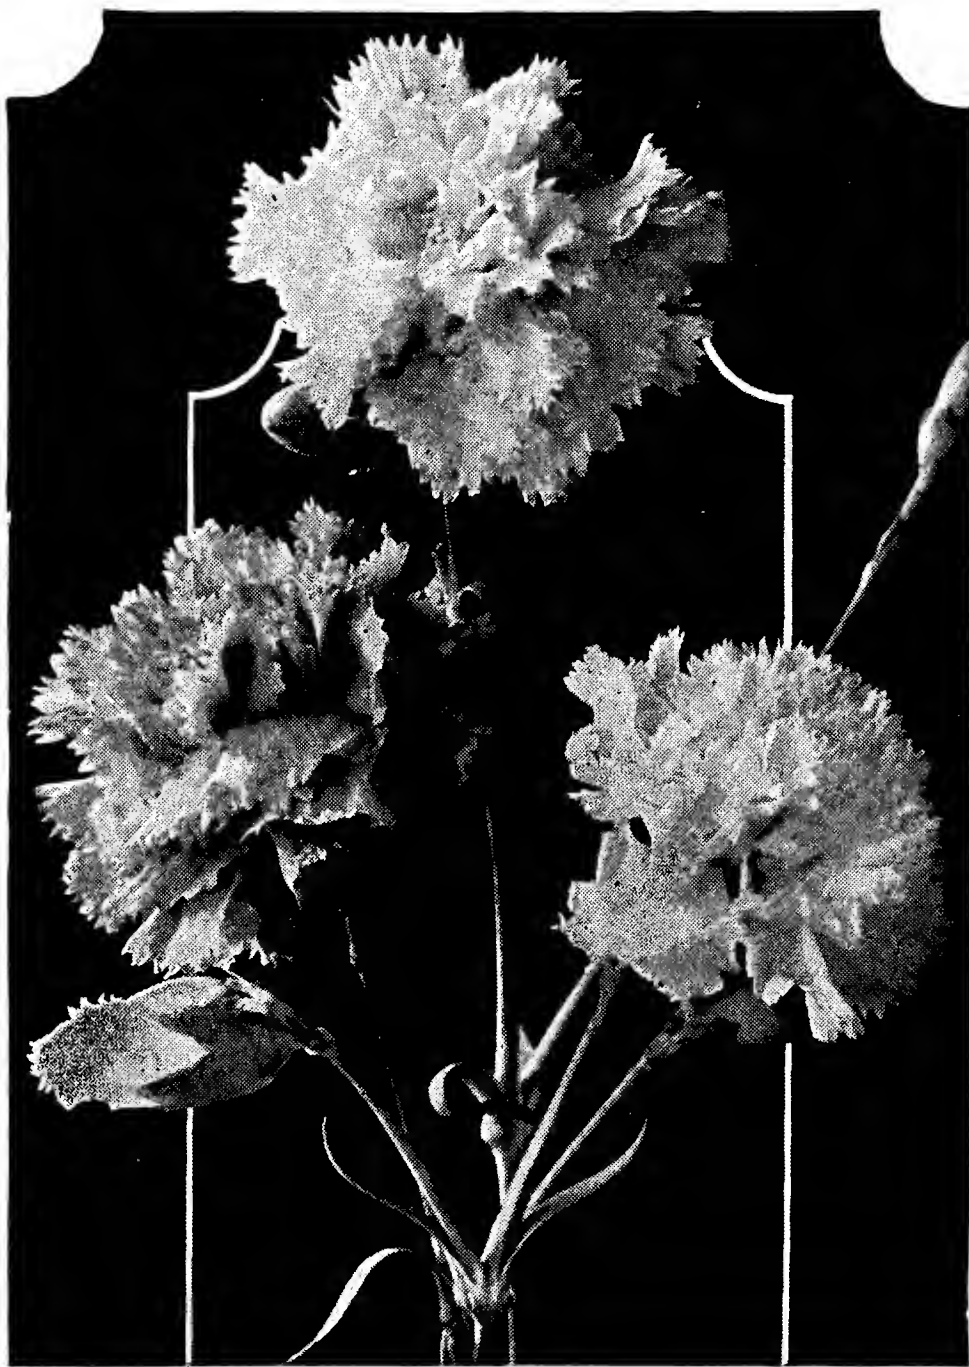

1201. Grenadin Dark Red. Ea. 20c, 3 for 50c
1202. Grenadin Golden Sun—Double deep yellow. Each 20c, 3 for 50c
1203. Grenadin King of the Blacks—Deep maroon red. Each ... 20c, 3 for 50c
1204. Grenadin Pink—Each 20c, 3 for 50c
1205. Grenadin Red—The most popular shade of all; very showy bright red. Each 20c, 3 for 50c
1206. Grenadin Red Half High—A semi-dwarf form of the above. Each 20c
3 for 50c
- 1206C. One each of the Grenadin Carnations for \$1.00
- 1206CC. One dozen Carnations for \$2.00
1207. Marguerite—Yellow. Each 25c
1208. Marguerite—Violet. Each 25c
- 1208C. 3 Marguerite Carnations for .. 60c
1209. Prague Giant—A new strong growing race of doubles in various colors. Each 20c, 3 for 50c
1210. Vienna Pink—A dwarfer strain than the Grenadins. Each 20c, 3 for 50c
1211. Vienna White—Each 20c, 3 for 50c
1212. Grenadin White—Each 20c, 3 for 50c
1213. White Beauty—Each 15c, 3 for 40c

CATANANCHE

1214. *Coerulea*—"Cupid's Dart"—Pale violet daisies with a dark center; makes a beautiful border plant and a fine summer cut, often used for drying. Each 15c

CENTAUREA

1215. *Dealbata*—3 feet. Beautiful deeply cut grayish foliage, and soft rosy pink double flowers in late Spring. Each 15c

Giant Hardy Carnation.
Catalog Numbers 1201-1213.

Rockery. A restful haven containing over 500 varieties of Perennials and Alpines.

1216. Macrocephala—3 feet. Large wide leaves with very odd rich golden yellow globular heads of bloom. Each 15c
1217. Montana—Blue or White, flowers on 18 inch stems. Will grow most anywhere. State color. Each ... 15c

NOTE—Centaureas are called the "Perennial Bachelor-Button."

CERASTIUM

1218. Tomentosum—9 inches. Often called Snow in Summer. Gray foliage; masses of white blooms. Each .. 15c

CHEIRANTHUS

1219. Allioni—15 inches. "Siberian Wall-flower." Rich vivid orange in abundance. Spring. It is best to buy these in the fall, as they are really a biennial. Each 15c
1220. Linifolius—15 inches. Very free flowering; lilac-mauve. Each .. 15c

CHELONE—Pentstemon Barbata

1221. Barbata Coccinea—3 feet. Very attractive scarlet with yellow. The Chelones are called Shellflowers. Each 15c, 2 for 25c
1222. Barbata Hybrida—Assorted shades of scarlet. Each 15c, 2 for 25c
1223. Barbata Praecox—Pink to cherry red. Each 15c, 2 for 25c
1224. Barbata Torreyi—Brick red. Each 15c
2 for 25c

CHRYSANTHEMUM

1225. Alice Howell—Combines orange yellow with bronze. Single.
1226. Ashes of Roses—Double.
1227. Bird of Paradise—Spider yellow.
1228. Bright Eyes—Small dainty pink.
1229. Brown Button.
1230. Calvin Coolidge—Single dark red with yellow center.
1231. Co-Ed.
1232. Chinese White.
1233. Dr. Englehard.
1234. Gold Lode—One of the finest very early large yellow; double.
1235. Normandie—Yellow; late August to October.
1236. Normandie—Pink; one of the finest tall pink Chrysanthemums.
1237. October Gold—Large pure yellow; double.

1238. Old Homestead.

1239. Old Rose—Small pom-pom type.

* * * * *

* 1240. Petite Louise—Large ragged pale *
* rose flowers. Very early to begin *
* blooming and keeps blooming until *
* frost. It also makes a very long last- *
* ing cut flower. *

* * * * *

1241. Paisley—A combination of autumn colors.

1242. Pom-pom—Yellow.

1243. Pom-pom—Lemon.

1244. Red Button.

1245. Rosy White—Small double.

1246. Shaggy White—Large.

1247. Uvalde—Double pure white.

1248. William Waite—Large bronze double.

- 1248C. Any of the above Chrysanthemums, your selection. Each 20c, doz. \$2.00

CHRYSANTHEMUMS—Dwarfs

1249. Amelia—Pink Cushion—Very compact habit, with large pink flowers, from early August to November. 12 to 15 inches. Each 20c, 3 for 50c
1250. Alpinum—Ferny foliage and white Marguerites with yellow eyes. 3 in. Each 25c
1251. Koreanum. Fine single pink blooms with a yellow eye. Late blooming. Each 35c
1252. Japanese Hybrids—2 feet. Early; assorted colors. Each 15c
Maximum—See Shasta Daisy.
1258. Mawii—Charming pink Marguerite; dainty silvery foliage, 1 ft. in height. Fine for rockeries. Each 20c

CHRYSOPSIS

125. Falcata—Aster-like plant; golden yellow blooms. Each 20c

CIMICIFUGA

1255. Racemosa—Pure white tail-like racemes blooming during July and August. They grow 4 to 6 feet. They will thrive the best in shady, moist places. Each 25c

CINERARIA

1256. Diamond—18 inches. Beautiful pure white foliage; yellow flowers. Very highly recommended for use in a gray garden, or in the regular rock-

ery as it sets off the coloring of the other plants. Each 20c, 3 for 50c

CLEMATIS

1258. Davidianna—3 feet. Chinese species; erect habit and sweet scented blue flowers. Each 25c

COLCHICUM

1259. Autumnale—The cup-shaped blooms, mauve, lavender and purple, appear as if by magic in September, long after the foliage has ripened. Ea. 15c
1260. Speciosum—Large flowers in autumn rose to crimson-purple, always with white throat. The Colchicums are often called the Fall Crocus.

CONVOLVULUS

1261. Mauritanicus — Morning Glory — An excellent persistent summer blooming trailer of blue from June to November. Each 25c

COREOPSIS

1262. Auriculata Superba — Beautiful free flowering yellow daisy with red dots around the disk. Each 20c
1263. Lanceolata—3 feet. Large golden yellow; blooms continuously all summer until late in the fall; very good for cutting. Each 15c
1264. Lanceolata Fl. Pl. — Semi-double. Each 15c
1265 Mayfield Giant—3 feet. Very vigorous in growth, and extra large yellow daisies. Each 20c
1266. Perry's Double — A new strain. Each 25c
1267. Rosea—Each 35c
1268. Verticillata—2 feet. Slender wiry plant, and greenish yellow flowers. Very different from the common Coreopsis. Each 25c

NOTE—Coreopsis is an excellent companion to Gaillardia.

- 1268C. One each of the 7 Coreopsis for \$1.

CORONILLA

1269. Varia—24 inches. Lilac purple flowers; a neat border plant. Spring. Each 20c

CORYDALIS

1270. Cheilanthifolia—12 inches. Beautiful fern-like foliage with brownish gold tints, and yellow flowers. A spring bloomer. Each 15c, 2 for 25c

1271. Lutea—12". Showy golden yellow flowers; glaucous foliage. Excellent for rockeries. Each 20c

COTULA

1272. Qualida — Forms a dense mat of ferny-like foliage, with small yellow daisies. Each 15c

CRUCIANELLA

1273. Stylosa—A rapid spreader of bright green foliage, with pretty clustered heads of rosy-pink flowers. Has a very strong odor. Each 20c, 2 for 35c

CYNOGLOSSUM

1274. Nervosum—"Chinese Forget-Me-Not"—Bright blue flowers on 2 ft. stems, blooms very freely. Each 20c

DAPHNE

1275. Cneorum—15 inches. One of the finest ornamental shrubs in cultivation; the foliage is evergreen with a bright luster to it. In the very early spring the plant is a mass of highly fragrant double vivid rose flowers. A prostrate growing gem for the rockery. The fragrance is comparable to the delicate Trailing Arbutus. Each 50c
Large size \$1.00 to \$3.00
1276. Cneorum Variegata—A form of the above with variegated foliage. Each 75c
1277. Mezereum—This beautiful deciduous shrub commences to bloom in this locality in February. The stems which are at this time completely bare of foliage are covered completely with a mass of exceedingly fragrant beautiful deep purplish pink booms. The attractive foliage which comes later will be thickly dotted with bright red seeds. Each .. 50c
Larger plants from 75c to .. \$5.00
1278. Odorum—The sweetest smelling of the flowering shrubs. Clusters of light pink, waxy flowers early in spring. 50c to \$1.00

DELPHINIUM

1279. Belladonna—3 feet. Varying shades of light blue; excellent for cutting. Each 15c, 2 for 25c
1280. Bellamosum — Dark blue flowering form of above. Each 15c, 2 for 25c

1281. Blackmore & Langdon—6 feet. An English Strain. Each 20c, 3 for 50c
One dozen for \$2.00
1282. Chinese Blue—2 feet. Finely cut foliage and intense gentian blue flowers. Each 20c, 3 for 50c
1283. Chinese Tom Thumb—Much dwarfer than the above and a more intense blue. Each .. 20c, 3 for 50c
1284. Formosanum—A dark blue form of Belladonna. Each .. 15c, 2 for 25c
1285. VAN'S SUPER GIANTS—Seedlings. Each 25c
- For separate shades, and seeds, see page 42.
1286. Wrexham—6 feet. Hollyhock flowered. Assorted colors. Each 20c
3 for 50c
1287. Wrexham Art Shades—Each .. 20c
3 for 50c
1288. Wrexham Light Blue Shades. Ea. 20c
3 for 50c
1289. Wrexham Mid Blue Shades. Ea. 20c
3 for 50c
1290. Wrexham Dark Blue Shades. Ea. 20c
3 for 50c
1291. Wrexham XXX Pastel Shades.
Each 20c, 3 for 50c
- 1291C. One dozen 20c plants for \$2.00, or \$12.00 per 100. 25 at 100 rate.
1292. Nudicaule—8 inches. Scarlet flowers. Each 25c
1293. Nudicaule—Chamois. Each 25c
1294. Nudicaule Lemon Gem—Each .. 25c

DESMODIUM

1295. Canadense—Racemes of purplish rose flowers. Each 50c

DIANTHUS

1296. Alwoodi—18 inches. A hybrid between Carnations and Pinks; very fine double flowers in assorted rose shades. Each 20c, 3 for 50c
1297. Alwoodi Alpinus—A perpetual flowering hybrid with large flowers, white with large pink center, on 6 to 8 inch stems. Each 25c
1298. Arenarius—6 inches. Fringed flowers with very pale purple. Each 20c
1299. Arvenensis—Pale pink flowers on four inch stems makes this a fine rockery plant. Each 20c
1300. Brevecaulis—6 inches. Large single pinks. Each 15c
1301. Caesius—Fringed rosy flowers on

- 6 inch stems above compact mounds of blue-grey foliage. Each ... 15c
1302. Caucausicus—Fine compact rock plant with deep rose flowers on 8 to 10 inch stems. Each 15c
1303. Crimson Bedder—Sport of the Sweet Williams. Deep red flowers. Ea. 15c
1304. Cruentis—2 feet. Grassy foliage; odd and attractive heads of very dark crimson. Each 15c
1305. Deltoides Alba—"Maiden Pink." White with dark eye. Each.... 15c
1306. Deltoides Brilliant—Very showy clear bright crimson pinks on 12 inch stems. Blooms from late April to June. Each 15c
1307. Dentosus Hybrids—A wonderfully showy strain of pinks with various colors. Many are blotched. Ea. 20c
1308. Double Dwarf Erfurt—6 inches. Sweet scented double pink blooms. Each 15c
1309. Graniticus—Similar to Deltoides Brilliant but lighter. 15c
1310. Knappi—A very unique and interesting plant for the alpine garden. This yellow Dianthus gives a welcome variation in any garden. 12 to 18 in. June to August. 25c
1311. Latifolius Atrococcineus—12". Very dark double red. As this blooms for a very long period, it makes a wonderfully attractive bedder. Each 15c
3 for 40c; Special \$1.00 per dozen.
1312. Mt. Hood—6". A delightful little dwarf pink. 25c
1313. Negectus—Dainty compact tufts of dark green foliage surmounted by large cherry red single blossoms on short individual stems. One of the finest plants for alpine gardens. They bloom in May and June, and again in the fall. 25c
1314. Plumarius—Plume Pinks—Clove Pinks. Assortment of colors. Ea. 15c
\$1.00 per dozen
1315. Plumarius Dark-eyed Beauty—Beautiful double pink with dark eye. 15c
\$1.50 per dozen
1316. Plumarius Highland Queen—A new bright crimson single. 25c
1317. Plumarius Peacock—Assorted doubles. Each 15c
1318. Plumarius Rose Queen—Double clear pink. Each 15c
1319. Plumarius Snow Queen—Double pure

- white. Each 15c
1320. Plumarius Spring Beauty—A fine assortment. Each 15c
1321. Sutton's Fragrant—A new very fragrant everblooming creation of Sutton's. It is a wonderful border plant. Each 50c
1322. Single Scotch—8 inches. Each .. 15c
1323. Superbus.—Fringed white with pale purple eye. Each 15c

DIANTHUS Barbatus—Sweet William

1324. Double Blood Red
1325. Double Black (Nigrescens)
1326. Double Pink
1327. Double Pure White
1328. Single Copper Red
1329. Single Turkey Red
- 1329C. Any of the above Sweet Williams for 15c each or \$1.25 a dozen

DICENTRA

1330. Cucullaria—"Dutchman's Breeches"—A splendid native with finely cut foliage and white flowers tipped creamy yellow. 4 to 6 inch stems. Each 25c
1331. Formosa—Rose-pink flowers on 10 inch stems. Each 25c
1332. Oregana (Glauc)—Silvery leaves and spikes or cream-colored flowers with purple tips make this rock Dicentra the most effective one of its family. Blooms over a long season; good drainage and sun. Each 35c
- 1332A. Spectabilis — The old-fashioned Bleeding Heart. Each 25c

DIASCIA

1333. Barberae—Flowers snapdragon like, small, very numerous, borne on stout strong and perfectly straight stalks, foot long. In bloom from June to October. Fine rock plant and cut flower. Rosy pink and salmon pink. Each 25c

DICTAMNUS—Gas Plant

1334. Albus—Very showy white flowers that are fragrant; blooming during the summer months. Prefers full sun and heavy soil. Each 35c
1335. Rubra—Spikes of rosy pink flowers with deeper veins in midsummer. Each 50c

DIGITALIS—Fox-Glove

1336. Ambigua—24" Dwarf yellow perennial. Each 25c
1337. Gloxiannaflora Purple—6 feet. Large biennial. Excellent for border plant. Each 15c
1338. Gloxiannaflora Rose. Each 15c
1339. Hybrida Lutzi—Salmon shades. Each 15c
- 1339C. One each of the foxgloves for 50c

DODECATHEON

1340. Latifolium — Shooting Star. Pink, brown and yellow flowers. Oval leaves. Established plants produce from 15 to 25 blooms to the stalk. A rock garden gem. Each 25c
1341. Meadia—Pink and rose colored Shooting Stars. Each. 25c

DORONICUM

1342. Caucausicum—Very early large golden yellow daisies on 24 inch stems. Excellent for cutting. Each 20c
1343. Clusii—Earlier than Caucausicum and only grows about 15". Each 20c

DRABA

1344. Borealis—Dainty tufts of foliage and white flowers on six inch stems. An excellent plant for the alpine garden. Each 25c
1345. Olympica—Dense mossy tufts and golden yellow blooms on six inch stems in the early spring. Each 25c
1346. Repens—A creeper with dainty bright yellow blooms in the early Spring. Each 20c

DRYAS

1347. Octopetala—Flat evergreen carpets of very small oak-like leaves with small anemone-like flowers during spring and summer. The seed pods of these Dryas are very attractive as they are feathery. Sunny situation. Each 25c
1348. Sundermani—Very similar to Octopetala except that in bud are pale yellow, opening pure white. Each 25c

ECHINACEA

1349. Purpurea—"Purple Cone Flower"—These daisies are very large, growing about 3 feet, reddish purple with prominent dark brown cone-shaped centers. Each 15c

ECHINOPS

1350. Ritro—Globe Thistle—Steel-blue thistle-like flowers in midsummer; excellent for use in dry bouquets. Each 20c

EIDELWEISS

See Leontopodium.

ERIGERON

1351. Aurantiacus Hybrids—Very bright colored daisies in various shades of orange, that bloom over a very long period. Each 25c
1352. Glauca—Dwarf stems with blue-green leaves, each topped with big pink, white or lavender flowers. Very attractive. Height 6 to 10 inches. Each 25c
1353. Leibergii—Dwarf. Each 50c
1354. Mucronatus—This plant blooms all summer. A creeper, with a profusion of pink and white daisies on 8 inch stems that do well in hot, dry climates. Each 20c
1355. Speciosus—18 inches. From May to July are large rosy-mauve flowers, with yellow centers, making an excellent cut flower. Also is useful for the foreground in the herbaceous border. Each 20c

ERINUS

- 1354—Alpinus—3 inches. Very dwarf evergreen plant with red purple flowers, from May to July. Each 25c

ERIOPHYLLUM—Caespitosum

See Bahia Lanata.

ERODIUM

1357. Chamaedryoides Roseum—Is a little jewel for the rock garden. Its twinkling little pink blossoms and silvery lacinated leaves endow it with charm enough for your most select spot. Best in a cool location, where it will bloom almost uninterruptedly. Each 35c
1358. Manescavi—This member of the geranium family has pretty foliage and deep rosy-purple flowers that bloom from June to September. Its seed pods are rather peculiar as they are long needle-shaped, and pointing upward. Each. 35c

ERYNGIUM

1359. Amethystinum—Sea Holly—2 feet; very spiny foliage and amethyst blue flowers for drying. Each 20c
1360. Planum—Steel blue flowers. Ea. 20c

ERYSSIMUM

1361. Pulchellum—Very showy early yellow flowers; 12 inches in height. Ea. 15c

EUPATORIUM

1362. Fraseri—2 feet. Dainty white feathery flowers on dark green foliage. Each 15c

EUVONYMOUS

1363. Radicans Argenteo Marginata—A very beautiful slow growing evergreen creeper with shiny variegated foliage. Each 35c

FILIPENDULA

1364. Hexapetela Flora-plena—3 feet. Attractive fern-like foliage and large panicles of cream colored blooms with red buds. Each 15c
1365. Ulmaria (Astilbe)—Large plumes of pure double white. Each 15c

GAILLARDIA

1366. Bergundy—Shining wine-red flowers about 2½ inches in diameter, on long stiff stems, from June until fall. Each 25c
1367. Dazzler—Large daisies, bright golden yellow, with rich maroon-red center. Each 20c
1368. Portola Hybrids—The flowers are very large. The petals being very broad and overlapping, of great substance, and spread out flat. Color a brilliant scarlet with copper hue. Petals heavily tipped with golden yellow. Each 15c
1369. Semi-Pleno—Semi doubles assorted. Each 15c
1370. Sybylla—Flowers large, vivid carmine, tipped white, with dark crimson center. Each. 15c
1371. Tangerine. Large orange-colored flowers. Each 15c
- 1371C. One each of the Gaillardias for 90c
- Note: These Gaillardias are raised from seed and do not run 100% true to color. However, we guarantee satisfaction.

GALEGA

1372. Bicolor Hartlandi—Makes a bushy plant 2 to 3 feet high, with clusters of miniature sweet peas; lilac and white. Very good for cutting. Ea. 20c

GALLIUM

1373. Aureum—"Lady's Bedstraw"—Flowers greatly resemble the golden rod; 18" sweet scented and is an excellent keeper as a cut flower. This plant is said to have been intermixed in the straw on which the Mother of Christ lay. Each 20c

GAURA

1374. Lindheimeri—Pinkish white flowers tinged with purple on 3 foot sprays makes this plant an excellent background plant, or for massing. Ea. 15c

GENISTA—Broom

1375. Decumbens Prostrata—A creeping broom for the rock garden; forms close mats of prostrate growths, the foliage being just a little hairy and the flowers yellow. 6 inches. Ea. 50c
1376. Hirsuta Procumbens—Very prostrate broom with trailing stems and masses of bright yellow flowers. Ea. 50c

GENTIANA

Nothing can compare with the blue of the Gentians in the alpine gardens. They require a large amount of root moisture and good drainage. They like a little leaf mold mixed in their soil.

1377. Acaulis—Large rich shining blue trumpets on a carpet of green make this plant indispensable in the alpine garden. While its natural blooming season is in the spring, it blooms again in the fall here. Each .. 50c
1378. Farreri—A creeper with grassy foliage and masses of sky blue flowers with white throats. Blooms in the fall. It is very similar to the variety Sino-Ornata. Each 50c
1379. Septemfida—Heads of sapphire blue flowers, somewhat variable, on 8 to 12 inch stems, during July and August. Each 50c
1380. Sino-Ornata—A rapid growing prostrate plant, with immense bright blue flowers, in September. Each .. 35c
1380C. One each of the Gentians for \$1.50

GERANIUM

1381. Endressi—Very beautiful bright rose flowers on 12 inch stems from June to August. Each 25c
1382. Grandiflorum—In our opinion is the best of all the Geraniums. It has a long flowering season making a fine border plant. The flowers are very large, bright blue flowers, veined crimson. Each 35c
1383. Roseum—8 inches. Showy bright pink. Each 25c
1384. Sanguineum—Creeper with red purple blooms. Each 25c

GEUM

1385. Bulgaricum—Showy orange flowers on 15 inch stems and close around dark green leaves makes this plant excellent for use in the rockery. Each 15c
1386. Heldrichi—Bright orange, similar to Bulgaricum. Spring. Each 15c
1387. Lady Stratheden—3 feet. Very large double yellow flowers; excellent for borders. Each 15c
1388. Mrs. Bradshaw—Large double red flowers blooming over a long period extremely showy. Each 15c
1389. Montanum—Glossy green leaves, and large bright golden yellow flowers on 3 to 6 inch stems, from May to October. Each 35c
1390. Orange Prince—Our own hybrid between Heldrichi and Lady Stratheden. Large semi-double flowers in bright orange. The plant is unusually husky in growth, making a real large clump in one season. Each 25c
1391. Sibericum—12 inches. Vivid orange in the early spring. Each 20c
1392. Tango—A new creation of Arthur Yates & Co., Sydney, Australia. It has not as yet bloomed with us. Each 35c

GLAUCIUM

1393. Burbank's Hybrids—"Horned Poppy"—This plant blooms continuously all summer, with a profusion of orange-yellow poppies. The foliage is glaucous. A very striking border plant. Each 20c

GLOBULARIA—Globe Daisy

1394. Bellidifolia—Pure white globes on

- four inch stems. Each 20c
 1395. *Tricosantha* — Very odd attractive grey-blue form of *Bellidifolia*. Ea 20c

GORMANIA

1396. *Watsoni*—4 inches; native; rosettes of large glaucous fleshy leaves and heads of soft cream flowers. A good novelty and rare. Each 50c

GRASS—Ornamental

1397. *Bengal Grass*—6 feet. Attractive foliage; stripes across leaves. Ea. 20s
 1398. *Blue Grass, Giant*—6 feet. Each 15c
 1399. *Eulalia Japonica*—12 inches. A very fine dwarf ribbon grass. Each 20c
 1400. *Festuca Glauca*—6 inches. Neat tufts of glaucous foliage. Each 20c
 1401. *Gama-Gama, Bamboo Grass*, 1 to 12 feet. Not a true grass; a beautiful background or screen plant with cream white flowers; very rapid grower. Each 15c to \$1.00
 1402. *Gymnotherix Japonica*—4 feet. Silvery spikes with purple anthers; similar to *Pampas Grass* but hardier. Each 25c
 1403. *Gynerium Argenteum*—*Pampas Grass* Each 35c

GYPSOPHILA—Baby's Breath

1404. *Acutifolia*—Tall graceful plants with pinkish flowers in June and July. 3 ft. Each 20c
 1405. *Bristol Fairy*—The improved new double for drying. Each 50c and 75c
 1406. *Manginii*—3 feet. Large flowers with a light pink. Each 15c
 1407. *Oldhamiana*—More compact in growth than *G. Paniculata*, and follows it in blooming season. Flowers vary from pale pink to rich deep pink. Ea. 25c
 1408. *Pacifica*—3 feet. A new clear pink. Each 25c
 1409. *Paniculata*—The old-fashioned double baby breath. Each 15c
 1410. *Paniculata Fl. Pl.*—Double seedlings. Each 20c
 1411. *Repens Alba*—6 inches. A fine rock plan with rose pink blooms. Ea. 15c
 1412. *Repens Rosea*—Rose Pink flowers. 6 inches. Each 20c
 1413. *Stevensii*—The old-fashioned Baby Breath of our grandmothers' gardens. Each 15c

HEDERA

1414. *Conglomerata*—A non-climbing ivy, dwarf and shrubby. Each 35c

HELENIUM

1415. *Autumnae Hybridum Nanum Praecox* —Early bronze and copper. Dwarf. Each 20c
 1416. *Autumnale Rubrum* — Bright terra cotta red; 3 to 4 feet. Each .. 15c
 1417. *Autumnale Superbum*—Clear golden yellow. 4 to 6 feet.
 These are all excellent background plants for fall blooming. Fine in combination with Fall Asters.
 1418. *Crimson Beauty*—Very dwarf compact variety with very large bronze-crimson flowers from June to October. Each 35c
 1419. *Bigelowi*—24 inches. Large golden yellow flowers with a big black disc. July. Each 25c
 1420. *Hoopesi*—Large daisies of bright terra cotta. June. Each 25c
 1421. *Riverton Gem*—Crimson and gold in showy masses. Each 20c

HELIANTHEMUM—Rock Rose

1422. *Mutabile*—Assorted. The Rock Roses like dry sandy soil. They bloom very profusely all summer. Each .. 15c
 1423. *Apple blossom*—A very delicate color. Each 20c
 1424. *Boule de Feu*—A double flowering deep red. Each 25c
 1425. *Double Orange*. Each 25c
 1426. *Peach*. Each 20c
 1427. *Delicate Pink*. Each 20c
 1428. *Large Light Pink*. Each 20c
 1429. *Mrs. E. M. Dunton*—Rosy Apricot. Each 20c
 1430. *Clear yellow*. Each 20c
 1431. *Rose*. Each 20c
 1432. *Rosy Apricot*. Each 20c
 1433. *Light Yellow*. Each 20c
 1434. *Double Yellow*. Each 25c
 1435. *White*. Each 20c
 1435C. One each of the Rock Roses for \$2.00.

HELIANTHUS—Sun Flower

1436. *Autumn Giant*—8 feet. Huge single golden yellow flowers in profusion in the late fall. A wonderful cut. Each 15c

1437. Autumn Glory—3 feet. A showy variety covered with orange yellow blooms. Each 15c
1438. Harvest Moon—5 feet. Large flowers the color of green gold. Each 15c
1439. Multiflorus Soleil D'or—4 feet. Large perfectly double rich yellow flowers borne in profusion. Can not be too highly recommended. Each 20c

HELIOPSIS

1440. Scabra Excelsa—4 feet. Semi-double rich yellow daisies similar to Helianthus Autumn Glory. Each 15c

HEMEROCALLIS

1441. Flava—Lemon Lily, or Day Lily—These are very good for planting along streams or moist banks of lily ponds. Each 20c
1442. Fulva—Deep orange form of Flava. Each 20c
1443. Fulva Kwanso Fl.Pl.—Double reddish orange flowers. Each 25c

HEPATICA

1444. Triloba—4 inches. A very fine early blue Spring gem. Each 25c

HEUCHERA—Coral Bells

1445. Brizoides—18 inches Fine light pink. Each 15c
1446. Sanguinea—Vivid Coral red. Fine for borders or rockeries. Also makes a nice cut flower. Each 20c
1447. Sanguinea-Rosea—Rich pink form of Sanguinea. Each 20c

HELICHRYSUM

1448. Angustifolium—Gray foliage surmounted by large clusters of bright golden yellow flowers. Can be dried. Each 15c
1449. Variety unknown. A very dwarf plant growing only 4 inches. Covered with dainty white straw flowers. Each 25c

HIBISCUS

1450. Mallow Marvels—4 feet. Large single Hollyhock-shaped flowers in varying shades of pink, white or red in the fall. Each 25c and 35c

HIERACIUM

1451. Villosum—Very odd hairy gray foliage with bright yellow flowers, on

12 inch stems. A fine plant for use in the Gray Garden. Each. 20c

HOLLYHOCK

(Althea Rosea)

All of our Hollyhocks are double.

1452. Appleblossom.
1453. Blood Red
1454. Crimson
1455. Lilac Beauty
1456. Maroon
1457. Nankeen Yellow
1458. Newport Pink
1459. Chamois
1460. Orange Prince. Each 25c
1461. Palling Belle—Soft silvery salmon.
1462. Queen of Sheba.—Deep primrose yellow, apricot tint.
1463. Salmon Rose
1464. White
1465. Yellow
1466. Imperator—New fringed type; with a blending of colors. Each 20c
1467. Triumph—Branching type; exquisite large flowers in every conceivable shade. Each 20c
- All Hollyhocks except where noted are 15c each, 3 for 40c; \$1.25 a dozen

HORMINUM

1468. Pyrenacea—Very dark green foliage close to the ground; and spikes of violet-purple flowers on 12 to 18 inch stems. Each 20c

HOSTA

Known as Funkia, or the Plantain Lily. They are grown mostly for their beautiful foliage, for the shady border, preferring a moist rich soil.

1469. Aurea Variegata — Handsome variegated golden foliage. Each 25c
1470. Lancifolia—Long narrow, dark green leaves and lilac blue flowers on 18 inch stems during July and August. Each 25c
1471. Lancifolia Undulata—(Undulata Variegata)—Variegated foliage 6 to 8 inches high with lilac blue flowers on 12 to 15 inch stems. June and July. Each 25c
1472. Plantaginea grandiflora — (Subcordata Grandiflora)—Large fragrant, pure white, lily-like flowers on 2 ft stems. Aug. to Oct. Each .. 35c

HOUSTONIA

1473. Coerulea—"Quaker Lady"—"Bluets"—3 inches in height. A rapid growing creeper with masses of attractive light blue stars. Blooms in the early spring, and some most of the summer. Each 20c

HUTCHINSEA

1474. Alpina—A splendid plant for the alpine garden, forming dense cushions of dark green cress leaves smothered with dainty white flowers during May and June. 3 inches. Each 25c

HYPERICUM

1475. Colchicum—Attractive bright evergreen foliage; large yellow blooms. Excellent for low hedges. Each 25c
 1476. Fragalis—2 inches. A tiny little native with small yellow flowers; a very dainty creeper. Each 25c
 1477. Reptans—6 inches. A fine trailer with beautiful yellow flowers from June to August. Each 20c

IBERIS

1478. Little Gem—A very dwarf compact pure white Candytuft. It is without doubt the best of this species. Ea 20c
 1479. Queen of Italy—10 inches. Dwarf evergreen foliage; flowers rosy lilac. Each 15c

INCARVILLEA

1480. Brevipes—Large crimson-purple flowers; excellent for rockeries. Ea. 35c
 1481. Delavayi—Hardy Gloxinia—Beautiful palm-like leaves, with large trumpets of a vivid rosy purple. Does not show growth until very late in the spring. Each 20c and 35c
 1482. Variabilis—Grows from 2 to 3 feet high, covered with pink or rose colored flowers throughout the summer. Each 35c

INULA

1483. Glandulosa Grandiflora—2 feet. Truly huge, very peculiar daisies of a vivid orange. Tropical foliage. Each 25c
 1484. Grandiflora—15 inches. Small foliage; myriads of yellow daisies. Each 25c
 1485. Royleana—2 feet. Very similar to

Glandulosa but somewhat later.

Each 25c

IRIS

Flags—Fleur de Lis

1486. Arenaria—"Sand Iris"—Smallest and most dwarf of all Iris, but with fairly large yellow flowers on 3 inch stems. Very choice and rare. Best in sandy soil, in full sun. Each 75c
 1487. Cristata—Crested Iris—Deep lavender blue flowers, on 6 inch stems. A fine early rock garden Iris. Each 20c
 1488. Cristata Alba.—Pure white form of the above. Each 25c

DWARF IRISES—Bearded

(Abbreviations: S—Standards; F—Falls)

1489. Albatre—Near white, veined pale lilac, beard white. Each 25c
 1490. Atroviolacea—Purple with a blue beard, sweet scented. The first to flower. 4 inches. Each 25c
 1491. Balkana—Reddish purple. 8 in. Ea 35c
 1492. Boquet—White and Heliotrope. 6 in. Each 25c
 1493. Beauty. Each 25c
 1494. Brautjunfer—S. Lilac white; F. purple at base, yellow at tips. 6 inches. Each 25c
 same color overcast rusty, gives the falls a pink tone. 9 inches. Each 25c
 1495. Buzzer—S. light lavender blue; F. 1496. Coerulea—A delicate soft blue. 4 in. Each 25c
 1497. Chamaeiris Aurea Maculata—Yellow veined brown. 6 inches. Each .. 25c
 1498. Endymion—Beautiful dark ruby red self. 9 inches. Each 35c
 1499. Lutea—Deep yellow self. 6 in. Ea 25c
 1500. Niobe—Dark purple self with a white beard. 5 inches. Each 35c
 1501. Purple Glory. Each 20c
 1502. Reichenbachii—Yellow self. 6 inches. Each 35c
 1503. Huron Imp—Large dark blue flowers. 6 inches. Each 50c
 1504. Pumilla Hybrids—Blue or yellow. Each 20c
 1505. Pygmy—4 inches. A charming rockery variety with large fragrant dark blue flowers. Each 25c
 1506. Spring Queen—2 inches. Exceptionally early deep violet blue. Each 35c

IRIS

1507. *Douglasi*—Broad foliage, with large flowers of various shades of blue on 18 to 24 inch stems. Each .. 25c
1508. *Fulva*—Unique and striking terra cotta red variety. Distinct. Good for cutting. Each 50c
1509. *Graminea*—Violet and blue flowers. Plum scented. Each 50c
1510. *Innominata*—A rare species from the mountains of Southern Oregon. Long slender, grass-like foliage, with flowers on 8 inch stems, golden yellow. Each 50c and 75c
1511. *Japonica* (*I. Fimbriata*)—Broad, thick foliage and branching flower stalks bearing many dainty orchid-like flowers of soft lavender with orange crests. 12 inches. Each 25c
1512. *Missouriensis*—Slender foliage and attractive flowers with dark blue veining on a white ground. Each 35c
1513. *Pseudocorus*—Deep yellow flowers with brown veins. Will grow in the water. 5 to 6 feet. Each 25c
1514. *Stylosa*—A grassy leaved winter blooming iris with showy lilac blue flowers on 12-inch stems. Each 25c
151. *Tectorum*—A beautiful species from the Orient with delicately crested blue flowers, 12 inches high in June. This is the roof Iris of Japan where it is grown on the thatched roofs of the cottages. Each 50c
1516. *Tenax*—Native. Dainty flowers in various shades of white and lavender. Many blossoms open at once, making an assortment of colors. 8 to 12 in. Each 25c
1517. *Verna*—A pretty dwarf with exquisite fragrant, starry flowers of blue, violet and gold, in early summer. Each 35c and 50c

GERMAN IRIS

1518. *Afterglow*—Smoky buff and lavender. Each 15c
1519. *Ann Leslie*—S. white flushed rose; F. *Dahlia carmine*. Each 15c
1520. *Ambassador*—S. a fascinating smoky velvet purple color; F. velvety purple maroon; beards and style yellow. Each 25c
1521. *Ann Farr*—White with a light blue border. Each 15c

1522. *Aurea*—A very pretty empire yellow. Each 15c
1523. *Bluet*—A lovely bright blue. Each 15c
1524. *Buto*—A nice larget velvet royal purple. Each 25c
1525. *Cecil Minturn*. Standard and Falls are soft rose. A beautiful flower with broad petals, gracefully waved and crinkled. Each 15c
1526. *Col. Candelot*—Brown and lavender. Each 10c
1527. *Delicatissima* — Pinkish lavender. Each 10c
1528. *Dalila*—S. white. F. dark pink. Each 15c
1529. *Eldorado*—Yellow, heliotrope and violet blend. Each 15c
1530. *Fairy*—Very fragrant. Early white bordered blue. Each 15c
1531. *Freda Mohr*—Very large giant pink bicolor. Each \$1.00
1532. *George Tribolet* — Velvety blackish purple. Each 15c
1533. *Gold Crest*—Blue toned lavender. Gold beard. Each 15c
1534. *Isolene*—Round standards of pale pinkish buff, strongly flushed mauve: the sharply reflexed falls are Chinese violet with russet tints at the sides. Each 20c
1535. *Jane Williamson*—Blend of rose, old gold and maroon. Each 50c
1536. *Juniata*—Tall fragrant violet blue. Each 15c
1537. *Jacquisiana*—Tall brownish red.
1538. *Le Correge*—Deep red brown overlaid bronze. \$1.00
1539. *La Neige*—Pure white. Each 15c
1540. *L. A. Williamson*—S. *Campanula* blue violet; F. rich royal purple with yellow beard. Very tall and distinct. Each 15c
1541. *Lohingrin*—Ruffled mauve violet. Each 15c
1542. *Lord of June*—S. blue lavender. F. lavender violet. Each 15c
1543. *Mother of Pearl*—Standards and falls pale bluish lavender with a faint creamy undertone. Large flowers of exceptional substance and perfect form on well branched stems. Ea. 15c
1544. *Madam Gaudichau*—A rich velvety violet purple. Each 25c
1545. *Mrs. Allen Gray*—A delicate lavender pink that appears pinker in the shadow, a variety of rather early

- bloom. Each 15c
1546. Mrs. Neubrunner—Deep golden yellow. Each 15c
1547. Mithris—Yellow and wine. Red veined white. Each 15c
1548. Ma Mie—White frilled violet. Fragrant. Each 15c
1549. Miranda—Tall bluish violet. Metallic sheen. Each 15c
1550. Madam Chereau—Ruffled white frilled blue. Each 15c
1551. Magnifica—Immense deep reddish violet. Each 25c
1552. Mary Orth—Scented blue violet. Each 15c
1553. Midwest—Beautiful ruffled bright rose over white ground. Each 25c
1554. Majestic—Huge. S. clear blue. F. raisin purple. Each 35c
1555. Midgard—Combination of soft yellow, pink and rose. Each 50c
1556. Nine Wells—Tall violet purple. 155c
1557. Pallida Dalmatica—Tall light blue. Each 15c
1558. Pluie d'or—Pure yellow; free flowering. Each \$1.50
1559. Pocahontas—Frilled white bordered lavender. Each 15c
1560. Prospero—Lavender violet. Each 15c
1561. Princess Royal—Soft blue. Each 15c
1562. Princess Beatrice—Fragrant violet blue. Each 20c
1563. Purity—Pure white. Each 15c
1564. Quaker Lady—Blend of blue, buff and yellow. Each 15c
1565. Roseway—Deep lavender pink. Ea 15c
1566. Ramona—Violet orange and buff blend. Each 25c
1567. Robert Wallace—Violet purplish black. Each 25c
1568. Rhein Nixe—S. white; F. violet-blue with white edge. Each 15c
1569. Shekinah—Scented deep yellow. 15c
1570. Seminole—Velvety red crimson. Very beautiful. Each 15c
1571. Storm Cloud—Smoky lilac and buff. Each 15c
1572. Troost—Rosy pink. Veined deeper shade. Each 15c
1573. Taj Mahal—Handsome pure white. Each 20c
1574. Tom Tit—Dark blue toned. Each 15c
1575. Sherwin Wright—Flowers most profusely; color a rich golden yellow without markings or shadings. Each 20c

1576. Vesper Gold—Pleasing golden apricot. Each 35c
1577. Virginia Mohr.—Pure deep yellow. Each 15c
1578. White Queen—Pure white. Each 15c
1579. W. J. Fryer—Bi-color. Deep yellow and dark purple. Each 15c
- Any twelve 15c Iris for 1.50

IRIS KAEMPFERI

Japanese Iris

Japanese Irises should be planted in Spring or September and October. Avoid all lime. They show to advantage when planted by a pool or along a stream.

1580. Date-Dogu—(3) Rich claret red, orange blotches, surrounded by blue halo. Each 35c
1581. Gekko-No-Nami — (6) White with prominent yellow bar. Drooping. Each 25c
1582. Kyodosan—(6) Very lovely orchid lavender pencilled white. Each 35c
1583. Mahogany—(6) Large, double flowers, the latest to bloom. Purple mahogany-red. The erect petals prettily crested. Each 35c
1584. Purple and Gold—Double, rich violet purple with white petaloids, tipped violet. Conspicuous golden throat with bluish white rays. Each .. 35c
1585. Sano-Natashi—(6) White. Each 25c
1586. Assortment of unnamed varieties. 15c

IRIS

1587. Ochroleuca—A tall robust species; white and yellow flowers. Each 20c

IRIS SIBERIAN

1588. Blue—4 feet. Very dainty and graceful. Each 20c
1589. Light Blue. Each 20c
1590. White. Each 20c
1591. English Iris—Assortment 15c

IVY

1592. Variegated—A fine slow growing vine; beautiful variegated foliage. Each 25c
1593. English Ivy. Each 25c

JASIONE

1594. Perennis—9 inches. Miniature bright blue Scabiosa-like flowers blooming in July and August. Very fine for rockeries. Each 25c

KITAIBELIA

- * * * * *
- * 1595. Vittifolia—7 feet. Large rosy *
 * white flowers; unusual. It is on the *
 * order of Abutilon with very large *
 * blooms and maple-like leaves. Can be *
 * used to very good advantage in natur- *
 * alizing. Each 25c and 35c *
 * * * * *

KNAUTIA

1596. Arvensis—A form of Scabiosa with
 beautiful pinkish lavender flowers on
 15 inch stems; blooming nearly all
 summer. Each 25c

LACINARIA

1597. Acidota—Beautiful purple spikes; 2
 feet. Each 25c

LATHRYUS

Trailing or climbing plants for growing
 on arches, trellises, or over rough banks.
 They die down every fall. It is known as
 Perennial or Everlasting Pea.

1598. Pink Pearl—Large clusters of deep
 rose flowers. Each 20c
 1599. Pubescens—Rare climber from the
 Argentine with pale blue flowers.
 Each 35c
 1600. Red. Each 20c
 1601. White Pearl—Each stem gives from
 12 to 15 flowers each. Each .. 20c

LEONTOPODIUM

1602. Alpinum—"Swiss Edelweiss"—This
 plant likes lime soil. Pretty silvery
 white leaves; starlike heads clothed
 with a dense white woolly substance.
 4 to 5 inches high. Each 25c

LEWISIA

These Western American natives require
 sharp drainage, and with the exception of
 deciduous species require a little shade
 during the hot and dry summer months.

1603. Columbianum—Evergreen; has a ros-
 ette of short leaves and rosy flowers
 stripped in the middle. 6 to 12
 inches. Each 25c
 1604. Finchi—Ncat rosettes of big fleshy
 leaves from which arise 6 to 10 inch
 stems bearing from 20 to 30 very
 handsome soft pink flowers mar-
 gined with a broad white band.
 Each 50c

1605. Rediviva—Montana State Flower.
 Deciduous. The plant throws up a
 rosette of green leaves somewhat re-
 sembling a tiny clump of coarse
 grass in winter or early spring. By
 May these leaves have completely
 disappeared and only the flower
 stems are showing. The blossoms are
 numerous and large, closely resem-
 bling a water-lily, varying from
 white to red, with pink the predom-
 inating color. After blooming, the
 plant dries up and disappears for
 the remainder of the summer.

Each 20c

1606. Tweedyi—The largest flowered of
 all the Lewisias, waxen apricot
 flowers. Each 75c

LIARTRIS

1607. Pycnostachya—Has numerous large
 4 to 5 ft. spikes that bloom from
 the top down, of a rich rosy pur-
 ple. It is sometimes called Blazing
 Star or Gay-feather. It is also very
 attractive to the bees. Each .. 25c
 1608. Scariosa—Earlier than Pycnostachya
 and of a clear purple. 3 ft. Each 25c
 1609. Spicata—Very similar to Pycnostach-
 ya, somewhat earlier in bloom and
 not quite so tall. Each 25c

LINARIA

1610. Alpina—4 inches. Glauous foliage;
 a very pretty trailer with tiny
 Snapdragon-like flowers of a bright
 purple with an orange lip. Each 20c
 1611. Alpina Rosea. Each 35c
 1612. Canon J. Want—3 feet. Very dainty
 pale pink flowers borne on long
 graceful stems in midsummer. 20c
 1613. Cymbalaria—Kenilworth Ivy—A fine
 trailing plant for rockeries, window
 boxes or hanging baskets. Each 15c
 1614. Hendersoni—Deep blue flowers on
 fine foliage; 15 inches. Each 20c
 1615. Macedonia Speciosa Dalmatica —
 Large yellow snapdragon-like flow-
 ers profusely borne all summer.
 Each 15c
 1616. Vulgaris—(Butter and Eggs) Ea. 15c

LINUM

1617. Alpinum—A prostrate growing flax
 with large clear sky-blue flowers
 all summer. Each 25c

- 1618—Capitatum—Golden yellow flowers in large flat heads on 8 to 12 inch stems. Each 50c
 1619. Lewissii—36 inches. Pretty blue with pale blotches; fragrant. Each 25c
 1620. Narbonense—2 feet. Graceful steel blue. Each 20c
 1621. Perenne—30 inches. The good old blue flax. Each 20c

LITHOSPERMUM

1622. Purpureo-Coeruleum—A lovely member of the race for naturalizing in shady places where it quickly forms masses of arching branches carrying heads of deep blue flowers. Each 50c
 1623. Prostratum — "Heavenly Blue" — A beautiful spring blooming trailer with sky blue flowers and shiny green foliage. Each 25c

LILIUM

Delivery made from September 1 to December 1.

1624. Henryi—5 to 6 feet. Flowers are a bright orange-yellow, of the Speciosum type. Each 25c
 1625. Tigrinum—6 to 7 feet. Tiger Lily. Each 25c
 1626. Tigrinum Fl. Pl.—The double Tiger Lily. Each 35c
 1627. Pardalinum — Leopard Lily. Bright scarlet shading to rich yellow, with dark spots. Each 25c

LOBELIA

1628. Cardinalis—Rich, fiery cardinal flowers on stems 2 to 3 feet. The Lobelias require a moist and shady position to do well. Each 25c
 1629. Cardinalis Queen Victoria—Blood red leaves, and glowing red flowers. Very good. Each 25c

LOTUS

1630. Corniculata Fl. Pl.—A hardy trailer covering dry banks and rock work. Bright yellow and orange blooms, all summer. Each 25c

LUPINUS

1631. Arborescens—Tree Lupin—Sunshine. Each 20c
 1632. Polyphyllus Blue—4 feet. Spikes of pea-shaped blooms, excellent for

- background or cut flowers. The Lupins bloom in the spring, but if cut back after blooming, they will bloom again. Each 15c
 1633. Polyphyllus Sutton's Crimson Beauty—A real beauty in Lupins. Ea. 35c
 1634. Polyphyllus Luteus—Delicate yellow. Each 20c
 1635. Polyphyllus Rose. Each 15c
 1636. Polyphyllus Salmoneus — Assorted salmon shades. Each 15c

LUTKEA

1637. Pectinata—A prostrate and trailing undershrub, forming dense carpets of bright green, with 2 to 6 inch stems crowned with heads of white flowers, from June to August. Does best on the cool side of a huge rock, but will thrive under trees and small shrubs. Each 35c

LYCHNIS

1638. Alpina—A very charming little dwarf with bright rose-pink flowers. 4 inches. Each 25c
 1639. Arkwrighti—Very showy large flowers in shades of red; it is well worth having in the yard. Each 20c
 1640. Chalcedonica — "Maltese Cross" — This is one of the showiest of the Lychnis. The large heads of vivid scarlet flowers are extremely showy, especially if the plant is well established. Grows from 3 to 4 feet; blooms all summer. Each 20c
 1641. Chalcedonica Salmon Queen. Each 20c
 1642. Flos-Cuculi — 20 inches. "Ragged Robin." A very showy mass of pink ragged flowers that bloom over a long period of time. Each 20c
 Flos Jovis—See Agrostemma Flos-Jovis.
 1643. Forresti—2 feet. A very showy type with deep rosy scarlet flowers of the Viscaria Type. Each 20c
 1644. Forresti Alba—White form of above. Each 20c
 1645. Fulgens—Large ball shaped flowers of a very deep red. Each 20c
 1646. Haageana Hybrids—24 inches. Similar to Arkwrighti, but is more in the shades of red, salmon, pink, and white. Each 20c
 1647. Viscaria Splendens—2 feet. Rose pink flowers in early spring. Each 20c

* * * * *

* 1648. *Viscaria Splendens* Fl. Pl.—This
* beautiful plant forms a dense tuft of
* evergreen foliage and in June sends
* up 15 inch spikes of double rich rose-
* red fragrant flowers. Does well in
* poor soil, and in full sun. Each 25c
* * * * *

LYSIMACHIA

1649. *Nummelaria* — “Creeping Jenny” —
Very excellent for rustic vases and
baskets, also for carpeting the
ground in shady places. A beauti-
ful rich golden yellow flower. Ea. 20c

LYTHRUM

1650. *Salicaria Roseum Superbum*—“Purple
Loosestrife.” 4 feet. Graceful spikes
of purplish rose. Splendid for back-
ground planting. Each 20c

MALVA

1651. *Moschata*—2 feet. Beautiful dark
green cut foliage and bright pink
flowers. Each 15c

MARGUERITE

1652. Hardy—5 feet. Showy masses of
large pure white daisies; very use-
ful for cutting. Each 15c

MATRICARIA

1653. *Capensis* Golden Ball—Golden Fever-
few. They resemble little button
Chrysanthemums, growing about 18
inches in height. Each 20c

1654. *Eximea Nana* Fl. Pl.—10 inches.
Double yellow; useful in the rockery
or for a neat tidy border. Each 20c

MAZUS

1655. *Rugosus*—A very rapid creeper with
light green foliage and lavender pink
blooms. Each 20c

MENTHA

1656. *Citrinodorous*—3 feet. Lemon Mint.
Each 20c

1657. *Requieni*—Very flat dainty creeper;
flowers mauve or pale purple; fol-
iage very strongly scented of pepper-
mint. Each 25c

1658. *Rotundifolia Variegata* — 20 inches;
round leafed mint; pink flowers. 20c

MERTENSIA

1659. *Ciliata*—2 feet. This *Mertensia* does
not disappear after blooming as does
M. Virginica. Each 20c

1660. *Virginica*—“Virginia Bluebell”—Ex-
tremely early nodding blue bells
with pink buds. Some of the flow-
ers are entirely pink. Each ... 25c

MONARDA

This will grow in either wet or dry lo-
cations. It is known as “Bee-balm” or
“Bergamot.”

1661. *Didyma Cambridge Scarlet*—Very odd
bright crimson flowers and fragrant
foliage. Each 15c

1662. *Didyma Violacea Superba*—Rosy vio-
let flowers borne in profusion. Ea. 20c

MONTBRETIA

Montbretias are very easily grown. They
should be planted rather deep, and mulched
in winter time, or treat them as *Gladioli*
Bulbs.

1663. *Crocasmaeflora*—Large flowers brick
red. Each 20c

1664. *Kathleen*—Reddish orange, tips scar-
let. Each 25c

1665. *His Majesty*—Very broad petals, deep
velvety scarlet, shading to gold; re-
verse of petals dark crimson shad-
ing down to gold. The largest flow-
ered of all. Each 25c

1666. *Marjorie*—Orange yellow with crim-
son center. Each 25c

NOTE—The last three varieties are of
the Earlham Large-flowered Hybrids.

MIMULUS

Sometimes called “Monkey Flower.”
They are very fine for bedding purposes,
as they bloom very profusely, except for
M. Moschata.

1667. *Sutton’s Hybrids*—A wonderful as-
sortment of colors. Each 15c
Dozen 1.25

1668—*Cardinalis*—18 inches. Very at-
tractive large flowered bright red.
Each 15c

1669. *Moschatus*—3 inches. Dainty little
creeper with golden yellow flowers.
Each 20c

1670. *Tigrinus*—18 inch. Large flowered.
Each 15c

Chrysanthemum Old Homestead.
Catalog Number 1238.

Onosma Taurica.
Catalog Number 1682.

Sempervivum Arachnoideum Laggeri. Catalog Number 1934.

Lewisia Tweedii. Catalog Number 1606.

Gentiana Acaulis. Catalog Number 1377.

Primula Cashmeriana. Catalog Number 1795.

Daphne Cneorum. Catalog Number 1275.

Arabis Albida Floro Pleno. Cat. No. 1084.

Pentstemon Southgate Gem.
Cat. No. 1698.

Cineraria Diamond. Cat. No. 1256.

MYOSOTIS

1671. *Palustris Semperflorens*—6 inches. Perennial Forget-me-not. Will grow in bogs or very dry soil. Each 15c

NEPETA

1672. *Mussini*—A delightful border or rockery plant with strong scented foliage and deep lavender blooms all summer. Very attractive to bees. Each 20c
1673. *Mussini Grandiflora*—12 inch. Larger leaved and larger flowered than the preceding. Each 20c

NIEREMBERGIA

1674. *Frutescens*—18 inches. Bright flax-like flowers of blue and white; needs slight protection in cold winters. It blooms all summer. Is very satisfactory either in the rockery or bed. Each 25c
1675. *Rivularis*—A rapid growing hardy creeper with large pure white cups with a yellow throat. Each 20c

OENOTHERA

1676. *Fraseri*—18 inches. Rich bright golden yellow flowers. Very effective in mass planting. Each 20c
1677. *Macrocarpa*—6 inches. A very fine Evening Primrose for the rockery with very large lemon yellow cups. Each 25c
1678. *Mexicana Rosea*—Soft pink flowers feathered with rose; fine for the rockery. Each 25c
1679. *Missouriensis*—Deeper colored form of *Macrocarpa*. Each 25c
1680. *Pusilla*—8 inches. A very dainty miniature with small yellow flowers. Each 25c

NOTE—The Evening Primroses all bloom all summer.

ONOSMA

- * * * * *
- * 1682. *Taurica*—"Golden Drops"—In or- *
 * der to really see the beauty of this *
 * plant it should be planted high up on *
 * the wall. It has clusters of soft yel- *
 * low bells hanging on 18 inch stems *
 * over rough hairy foliage. Each .. 50c *
 * * * * *

OMPHALODES

1681. *Cappadocica*—6 inches. A very striking early flowered semi-trailer with dark foliage and bright blue flowers. Each 20c

OXALIS

1683. *Adenophylla*—We consider this the best of our Oxalis. It has crinkly grey-green foliage with large flowers of lilac-pink, darkening to crimson at the base. Likes a light, well-drained soil in full sun. Ea. 50c
1684. *Corniculata*—Red purple foliage and bright yellow flowers. Each .. 15c
1685. *Trappeliodes*—Very similar to *Corniculata* except that is more dwarf. Each 20c

PACHYSANDRA

1686. *Terminalis*—"Japanese Spurge"—A very fine ground cover for all shady places and the only plant which will thrive under pine trees. Has bright glossy foliage 8 to 12 inches high. Each 20c

PARDANTHUS

1687. *Sinensis*—One of the oldest flowers in cultivation. It is often called Blackberry Lily, or Leopard Flower. Bright orange star shaped flowers with black spots followed by seed pods that resemble a ripe blackberry. Each 20c

PENTSTEMON

This American Genus is indispensable in the garden and rockery. It gives a wide variety of colors, heights, seasons of bloom. Botanists disagree on the names and habits of many of these beautiful flowers that might be classed as the backbone of Western gardens.

1688. *Barrettiae*—A dwarf, shrubby native evergreen species with silvered foliage and short spikes of lilac-purple flowers. Each 35c

- * * * * *
- * 1689. *Blue Gem*—This plant is indeed a *
 * gem as it has beautiful long trumpets *
 * of rich blue, some with a pink caste. *
 * Blooms all summer. Each 20c, 3 for 50c *
 * * * * *
1690. *Cardwelli*—Native evergreen shrub, 8 to 12 inches in height, covered sev-

- eral times each year with short spikes of bright bluish-purple flowers. Each 35c
1691. *Centranthifolius*—3 feet. The Scarlet Bugler. Rich vermillion. Each 25c
1692. *Confertus Caeruleo-Purpureus*—Shiny bright green foliage; blue flowers about 3 feet in height. Each .. 25c
1693. *Davidsoni Rosea*—Clear pink flowers of an unusual shade. Each 35c
1694. *Glaber*—18 inches. A very beautiful hybrid strain; showy trumpets varying from beautiful pink to soft blue. Each 25c
1695. *Graciella Hybrida*—2 feet. Graceful strain of mixed colors for border or cutting. Each 25c
1696. *Gracillus*—2 feet. Pure white. Ea. 25c
1697. *Grandiflorus*—Lilac blue flowers two inches long; on 2 foot spikes. Very showy. Each 25c
- * * * * *
- * 1698. *Hartwegi Southgate Gem*—2 feet. *
- * This is a wonderful plant for bor- *
- * ders, bedding, or cutting. Its flowers *
- * are of the Sensation type, a rich crim- *
- * son scarlet, blooming all summer until *
- * very late in the fall. The picture of *
- * the flower was taken the first week in *
- * December. Each 20c, 3 for 50c, *
- * Per dozen \$1.50 *
- * * * * *
1699. *Hartwegi Albus* — White form of above. Each 25c
1700. *Hirsutus*—2 feet. Lavender purple. Each 20c
1701. *Menziesii*—6 inches. A pretty species; mounds of dark evergreen foliage, varying shades of pink trumpets. Each 25c
1702. *Newberryi*—4 inches. Sub-shrubby species with very large bright carmine flowers. Each 35c
1703. *Pubescens*—18 inches. Violet purple and white. Each 20c
1704. *Rattani Minor*—4 inches. Dark green foliage; lavender blooms. Each 20c
1705. *Rupicola*—Dwarf blue-green foliage; slow growing; with large vivid scarlet blooms. Each 35c
1706. *Pulchellus*—2 feet. A very beautiful type with profusion of mauve-pink flowers, good for cutting. Each 25c
1707. *Venustus*—Very free flowering rosy lavender flowers and dark green foliage. Each 25c

PAPAVER

1708. *Alpinus*—6 inches, a very pretty dwarf poppy with glaucous foliage and flowers in various colors. Ea. 20c
1709. *Nudicaule Orange*—Iceland Poppy—Blooms all summer. Excellent for cutting. It is really a self-sowing biennial. Each 15c
1710. *Nudicaule Pearls of Dawn*—New salmon shades. Each 15c
1711. *Nudicaule Rose Tints*—Seed bought from an Australian merchant. Ea. 20c
1712. *Nudicaule Yellow*. Each 15c
1713. *Orientalis*—Apricot shades. Each 20c
1714. *Orientalis Beauty of Livermore*—Immense blood red. Each 25c
1715. *Orientalis Mrs. Perry*—Salmon rose. Each 20c
1716. *Orientalis Olympica*—A bright rich flame scarlet; double flowers. Ea. 25c
1717. *Orientalis Perry's White* — Satiny white with maroon blotches at base of petals. Each 25c
1718. *Orientalis Salmon Shades*. Each 20c
1719. *Orientalis Scarlet*. Each 20c

PELLAEA

1720. *Densa*—A tiny rock fern. Hardy and fine for rock garden. 4 in. Each 30c

PEONY

1721. *Edulis Superbis* — Large rich pink. Each 35c
1722. *Felix Crousse*—Very good red. Ea. 35c
1723. *Festiva Maxima*—Pure white. Ea. 35c

PHLOX—DWARF TYPES

1724. *Adsurgens*—10 inches. Native; dense mats of bright evergreen foliage; clusters of pink to white flowers. A rare gem for the rockery. Ea. 35c
1725. *Amoena*—Dwarf green foliage and abundant beautiful pink flowers in early spring and late fall. Each 25c
1726. *Davuricata Canadensis* — 15 inches. 3 beautiful lavender blue Phlox native to the Middle Western States. Thrives in half shade or full sun. Each 25c
1727. *Ovata Caroliniana* — Rather large leaves, in a compact mass, with pinkish or light red flowers on 12 inch stems during May and June. Each 25c
1728. *Procumbens Coerulea* — A creeping form with rough grayish leaves and

- soft blue flowers. Each 50c
1729. Secacea Vivid—Very vivid rose pink; creeper. Blooms early in the spring. Each 25c
1730. Subulata — Atropurpurea. 6 inches. A beautiful deep wine red. Each 25c
1731. Subulata Blue Hills—Compact grower with flowers of blue, tinged with lavender. A prolific bloomer. Ea. 25c
1732. Subulata Lavender—Each 20c
1733. Subulata Rose—Each 20c
1734. Subulata Rosina — A very rapid creeper with showy masses of rose flowers without the center eye. 20c
1735. Subulata White—Each 20c
1736. Verna—8 inches. A fine gem with large deep pink flowers. Each 25c

PHLOX DECUSSATA

1734. Africa—A fine new red, with well shaped flowers of brilliant carmine-red which have a blood-red eye. Each 25c
1738. Antone Mercier—A beautiful combination of lavender and white. 20c
1739. Dr. Wagner — Bright rosy scarlet. Each 20c
1740. Ecleuror—Carmine violet red with pinkish center. Very early. Each 20c
1741. Elizabeth Campbell—Beautiful soft pink. Each 20c
1742. Firebrand—Each 25c
1743. Gefion—Light appleblossom. Each 20c
1744. Gwendolyn—Clear lavender rose. 20c
1745. Gypsy Queen—Each 25c
1746. Joan of Arc—Pure white. Each 20c
1747. Kaiser—Rose scarlet. Each ... 20c
1748. Lavender Gem—Tall. Each 20c
1749. Leah—Lavender tinted rose. Ea. 20c
1750. Le Mahdre—Mauve. Each 20c
1751. La Vague—Pink. Each 20c
1752. Millie Van Hoboken—Large trusses of salmon-pink with deeper eye. Each 25c
1753. Madam Paul Dutre—Salmon rose. 20c
1754. Mrs. Jenkins—New pure white. 20c
1755. New Hybrids — A beautiful assortment of all shades. Each 20c
1756. Rheinlander—Large bright red. 20c
1757. Salmon Beauty—Each 20c
1758. Seibold's Scarlet—Very vivid. Ea. 20c
1759. Thor—Excellent large deep pink. 20c
1760. Pink Wonder—Tall clear pink with a darker eye. Each 20c
1761. White Beauty—Each 20c

1762. White Perfection — Contrasting eye. Each 20c
- 1762C. One each of the 20c Phlox for \$3.50

PHYSALIS—Chinese Lantern

1763. Bunyardi—3 feet. This elegant and striking hybrid has proven a most useful decorative plant producing glowing orange lanterns in abundance. Can be dried. Each 15c
1764. Franchetti—3 feet. Deeper orange than the above. Usually get better results in producing lanterns if there is one of each. Each 15c
- 1764C. One of each for 25c

PHYSOSTEGIA

1765. Virginica Alba—3 feet. Pure white; close compact spikes. Each .. 20c
1766. Virginica Vivid—2 feet. Very showy deep rose. Each 25c
1767. Virginica Compacta Nana—18 inches. Bright pink. Each 20c

PYTEUM

1768. Scheuchzeri—Peculiar heads of violet bloom resembling the Jasione. Ea. 35c

PLATYCODON

1769. Grandiflora—2 feet. Large bells in light or dark blue. Sometimes called Chinese Bellflower. Each 25c
1770. Mariesii—12 inches. Bright blue. 25c

PLUMBAGO

1771. Larpentae—One of the most desirable rock plants. It is of dwarf spreading habit, growing 6 to 8 inches high, covered with deep blue flowers during late summer and fall. Each 25c

POLEMONIUM

1772. Carneum—A pink or salmon colored beauty; sprawling. 12 inches. Ea. 25c
1773. Elegans—Tiny alpine Jacob's Ladder with very fine foliage, light blue yellow-eyed flowers. Very desirable species for cool location in the rockery. 4 inches. Each .. 50c
1774. Humile—A very pretty alpine with pale blue flowers. Each 20c
1775. Prima Donna—3 feet. Attractive foliage; deep blue flowers. Each 20c
1776. Reptans — 12 inches. Exceedingly showy; early vivid blue. Each 20c

1777. *Richardsoni*—Very similar to *Prima Donna*. Deeper shade of blue. Ea. 20c
 1777C. One each of the *Polemoniums*, \$1.00

POLYGONUM

1778. *Vaccinifolium*—15 inches. Dense foliage spikes of odd pink bloom. 20c

POTENTILLA

This family is very attractive for the rock garden. It is called "Flowering Strawberry." They vary from dainty creepers to 2 ft. plants. Easily grown, in full sun.

1779. *Alpina*—3 inches. Dark green foliage and bright yellow flowers. Each 20c
 1780. *Calabra*—6 inches. A fine plant for the gray garden. Forms a low mat with bright yellow flowers. Each 20c
 1781. *Cinerea*—4 inches. Very dainty orange yellow, glaucous foliage. 20c
 1782. *Gibsoni*—12 inches. A lovely scarlet flowered type. Each 25c
 1783. *Multiflora Nana*—Dwarf grower with large red and yellow semi-double blooms; blooms very profusely. 20c
 1785. *Nepalensis Miss Willmott*—A cherry red flowering form. Each 20c
 1786. *Nepalensis Roxana*—Large flowers of bright salmon. Each 20c
 1787. *Pyrenacea*—12 inches. Very early canary yellow. Each 25c
 1788. *Tridentata*—Small flowered white. Each 20c
 1789. *Tonguei*—Very dwarf apricot blossoms with crimson centers. Dwarf and very choice. Each 75c

POLYSTICHUM

1790. *Scopulinum*—A hardy fern. Each 50c

PRIMULA

1791. *Auricula Giant*—9 inches. The hardiest of primroses. Smooth glaucous foliage, with various shades of velvety colors with contrasting eye. Each .. 20c. Special, doz. .. \$1.75
 1792. *Acaulis Double Lavender*—These flowers resemble little roses. Ea. 25c

* * * * *

- * 1795. *Cashmeriana*—One of the most *
 * beautiful of Primroses. Extremely *
 * early to bloom. It has round globular *
 * flowers of varying shades of violet. *
 * Fine for the rock garden. Each .. 25c *
 * Dozen \$2.00 *
 * * * * *

1793. *Acaulis Double White*—Each .. 35c
 1794. *Acaulis Single Blue*—Each 25c
 1796. *Cockburniana*—Neat compact farinose rosettes of leaves with short spikes of burnt orange blooms. Each .. 50c
 1797. *Cortusoides*—Crinkled heart shaped leaves and deep rose colored blossoms. 6 inches. Each 35c
 1798. *Farinosa*—An unusual pale purple dwarf with Farinose foliage. Has a distinct eye. Grows nicely among the rocks. 6 inches. Each 35c
 1799. *Japonica*—New hybrids of rose, orange and carmine. Flowers in whorls. Each 35c
 1800. *Juliae*—A dwarf crumpled mass of heart shaped leaves; and showy flowers of starry claret flowers with golden eyes. Spring and again in the fall. Each 35c

PRIMULA VERIS

The old-fashioned garden Primroses.

1801. Assorted—A very fine mixture of colors. Each 15c
 1802. *Aurea*—Dwarf golden yellow. Ea. 20c
 1803. *Early Sunshine*—In bloom nearly 2 or 3 weeks before the others. Ea. 15c
 1804. *Emily Haven*—White with bright orange center. Each 20c
 1805. *Gold Laced*—Each 20c
 1801. *Gypsy Queen*—American Beauty Red. Each 20c
 1807. *Kleynii*—Distinct large orange yellow seedlings. Satisfaction guaranteed. Each 25c
 1808. *Old Faithful*—Light yellow. Each 20c
 1809. *Purple Mystery*. Each 20c
 1810. *Queen of the Reds*. Each 20c
 1811. *Red Beauty*—Each 20c
 1812. *Reno*—Orange and red. Each ... 20c
 1813. *Ruby Jewel*—Each 20c
 1814. *Semi-double White*—Each 20c
 1815. *Sunburst*—Rich dark yellow. Each 20c
 1816. *Virginia Haugen*—Velvety dark red; with yellow edge. Each 20c

NOTE—Most of these names are our own names of colors of *P. Veris*.

1817. *Queen of Heaven*—*Acaulis* type with nice blue flowers on stems 6 to 8 inches. Each 50c
 1818. *Vulgaris*—Cowslip, assorted colors. Each 15c

PRUNELLA

1819. Grandiflora—8 inches. Very odd purple blooms; rapid growing. Each 15c
 1820. Rubrens—6 inches. Bright deep rose red. Each 20c

PULMONARIA

1821. Angustifolia—8 inches. Low dark green foliage; extremely early blue flowers that are pink in the bud. Very similar to the Mertensia. Very showy. Each 20c
 1822. Saccharata—12 inches. Very decorative spotted green and white foliage, and pretty blue flowers. Very ornamental for just the foliage. Ea. 25c
 1823. Saccharata Mrs. Moon—Handsome silver and green variegated foliage; with bright pink flowers, with some blue. Very uncommon. Each .. 50c

PYRETHRUM

Painted Daisies are very fine for use as cut flowers. They bloom in the Spring and if cut back will bloom again.

1824. Atrosanguineum—2 to 3 feet. Large deep red daisies. Each 20c
 1825. Carneum—Flesh pink. Each .. 20c
 1826. Double Assorted—Double and semi-double in all shades. Each .. 25c
 1827. James Kelway—Large dark red. 20c
 1828. Roseum—Clear deep pink. Each 20c
 1829. Roseum Assorted—All shades from white to dark red. Each 15c
 1829A. Tchihatchewi. Each 15c
 1829C. One each of the Pyrethrums, \$1.00

ROMNEYA

- * * * * *
 * 1830. Coulteri—California Tree or Bush *
 * Poppy—Fine glaucous leaves and huge *
 * white poppy-like flowers, 6 to 8 inches *
 * across, which have many golden an- *
 * thers and are very fragrant. Should *
 * be planted in full sun, in well drained *
 * soil It grows 6 to 8 feet. Spring is *
 * the best time to plant this. Each 50c, *
 * 75c and \$1.00 *
 * * * * *

1831. Hirta—Black Eyed Susan—2 feet. Large deep orange daisies with a prominent black cone borne in profusion all summer and autumn; excellent for cutting. Each 20c
 1831A. Laciniata—8 feet. Single Golden

Glow. Huge masses of large golden yellow daisies with a brown cone. Each 20c

1832. Laciniata Fl. Pl.—Double Golden Glow. Each 20c
 1833. Newmani—Very similar to R. Hirta except that it is more yellow than orange. Each 20c
 1834. Purpurea—Echinacea Purpurea.

SAGINA

1835. Subulata — Mossy green cushions, studded with white flowers during May and June. For stepping stones and ground cover in semi-shady places. Each 25c

SALVIA

1836. Argentea—3 feet. Large hairy white ornamental foliage; very beautiful. Each 35c
 1837. Azurea Grandiflora—3 to 4 feet. Masses of sky blue flowers. August to October. Each 20c
 1838. Dichroa—3 ft. Spikes of deep blue flowers; very odd foliage. Each 25c
 1839. Globosa—Silvery gray foliage that lies flat to the ground; white flowers. Each 25c
 1840. Glutinosa—2 to 3 feet. Very odd and attractive golden yellow flowers in whorls. Rare. Each 35c
 1841. Nemerosa Superba—2 feet. Bright blue. Each 20c
 1842. Nutans—2 feet. This plant blooms in the spring; it is very free flowering. Masses of bright blue flowers that are fine for cutting. Each 25c
 1843. Officinalis Variegated—2 feet. Attractive variegated form of the medicinal sage. Each 20c
 1844. Patens—2 feet. Very attractive royal blue. Each 20c
 1845. Pratensis—Violet blue; free flowering. Each 20c
 1846. Pratensis Tenorei—Bright blue; continuous blooming. Each 25c
 1847. Turkestanica—3 to 4 feet. Very odd white flowers with a pink caste. Each 25c
 1848. Verbascifolia Syria—6 feet. Large rather glaucous foliage; and very odd blue flowers. Effective in mass planting. Each 25c
 1848C. One each of the Salvias for \$2.75

SANTOLINA

1849. *Chamaecyparissus* — "Lavender Cotton" — This is rather a shrubby plant and can be trimmed to grow any way you want it. Bluish white foliage; and double yellow flowers. Each 25c

SAPONARIA

1850. *Ocymoides Splendens* — A very nice plant for planting on dry banks or poor soils. It sends out long trailers that are covered with bright rose-pink flowers from June to August. Very showy. Each 20c
1851. *Officinalis* — 3 feet. Bouncing Bet. A good cut flower. Each 20c

SATUREA

1852. *Pygmea* — A delightful, sun-loving wiry little 8-inch shrub covered with masses of white or pink flowers. Something new and extra fine. 50c

SAXIFRAGE

1853. *Aizoon* — Neat encrusted form; with white flowers on 15 inch stems. Each 20c
1856. *Aizoon Rosea* — Light pink flowers. Each 20c
1857. *Andrewsi* — Encrusted type with long narrow shiny green leaves and white flowers. Each 25c
1858. *Baldensis* — The tiniest of the encrusted Saxifrages. Creamy white flowers on 3 inch stems. Each 25c
1859. *Cochlaeris* — Tiny mounds of silvered rosettes. Graceful spray of white flowers on 4 inch reddish stems. Each 50c
1860. *Cordifolia (Megasea)* — Huge glossy leaves richly colored in fall and winter. Large heads of rose flowers very early in the spring. 25c and 50c
1861. *Decepiens* — Gilford's Seedlings — Fine compact growing mossy type, crimson flowers. Each 35c
1862. *Decepiens* — Red. Each 20c
1863. *Decepiens* — Rose. Each 20c
1864. *Decepiens* — White. Each 20c
1865. *Decepiens* — Dwarf dark red. Each 25c
1866. *Elizabethae* — Grayish green mats with soft yellow flowers. 4 inches. Each 35c
1867. *Ferdinand Coubergi* — Gray green rosettes with bright yellow flowers.

Makes large mats. Each 35c

1868. *Lagroveana* — Neat, compact rosettes making large mats, not over an inch high. Creamy white flowers on six inch stems. Each 25c
1869. *Longofolia Hybrids* — Handsome large encrusted foliage; tall panicles of pure white flowers. It is very good for producing a natural effect in the rockery. Each 20c
1870. *Macnabiense* — A fine white flowered miniature encrusted type. Each 25c
1871. *Pectinata* — Very neat encrusted rosettes. Each 25c
1872. *Pyramidalis* — An encrusted type which have bread leaves; makes a large clump. Panicles of white flowers, speckled with crimson. 2 to 3 feet. This flower is very good for cutting, as it has good keeping qualities, and serves the purpose of a filler. Each 25c
1873. *Umbrosa, London's Pride* — Dark green rosettes, making a large clump. Rosy red flowers. Will grow in shade. Each 20c

SCABIOSA

1874. *Caucausica* — 2 to 3 feet. Large light blue flowers; excellent for cutting. Each 20c
1875. *Japonica* — 2 to 3 feet. Often called Pin Cushion Flowers, or Blue Bonnet. Has finely cut foliage; clear lavender blue flowers. Each .. 20c

SCUTTELARIA

1876. *Alpina* — A spreading plant with large lavender-purple and white flowers in midsummer. A fine rock plant. 25c

SEDUMS

All sedums are, except where otherwise noted, creepers. Practically all are evergreen. They are fine for rock garden work as they will withstand a great amount of drouth and neglect, and remain attractive at all times of the year. The Sedum family is very confused as to proper names. We have tried to the best of our knowledge to be correct in our names; however, we might be mistaken.

1877. *Acre* — Gold Moss — The commonest form of all, but very pretty. Ea. 15c
1878. *Acre Variegated* — This variety has each shoot tipped golden yellow in

- the winter, giving it the appearance of being in bloom. Each 20c
1879. Acre Verdissima—A very dark green form of the common Acre. Each 15c
1880. Aizoon—Fleshy dark green foliage; bronze yellow blooms. Each .. 15c
1881. Album—A rapid dark green creeper with white flowers. Each 15c
1882. Altissima — Glaucus foliage; yellow flowers. Each 15c
1883. Anglicum (Glaucum) — Handsome dense mats of glaucous foliage; white blooms. Each 15c
1884. Anacampestre — Very odd glaucous serpentine foliage. Each 20c
1885. Brevifolium — Very dainty minute bright green; white foliage. Each 15c
1886. Crimson Hybrid—A fast growing red leaved variety. Each 15c
1867. Dasyphyllum — Minute gray foliage; white flowers; a gem. Each ... 20c
1888. Dasyphyllum Corsicum—Smaller form of the above. Each 25c
1889. Divergens—Handsome red and green foliage; yellow flowers. Each 20c
1890. Douglasi (Siskuensis) — Rather tall sturdy dark green foliage; dark yellow blooms. Each 20c
1891. Faberia — A gray leaved Japanese form. Each 25c
1892. Ewersii—One of the most attractive; glaucous foliage, pink flowers. 20c
1893. Hispanicum — Dainty glaucous foliage; white flowers. Each 20c
1894. Hispanicum Glaucum—Very tiny and compact. Each 20c
1895. Hybridum—Fleshy dark green foliage; bronze flowers. Each .. 15c
1896. Kamschaticum—Exceptionally showy and sturdy; deep bronze and yellow flowers. Each 20c
1897. Kamschaticum Variegated. Each 25c
1898. Kamschaticum Flavissima — Bright form. Each 20c
1899. Lydium — Carpets of bright green that turn to a rich deep red, when in full sun and dry positions. Ea. 20c
1900. Maximum Atropurpurea—2 feet. A very rare tall growing purple form. Each 30c
1901. Middendorffianum — Brownish yellow flowers; serrated leaves. Each 20c
1902. Mesenberata—Looks very much like the Sempervivum; very slow growing. Each 25c
1903. Muralis—Exceptionally fine dark red foliage; light pink flowers. Each 15c
1904. Nevi—Rosettes of grayish spathulate leaves, rather compact and white flowers on 4 inch stems. Each 25c
1905. Obtusom—Odd fast growing foliage; one of the best mats. Each 15c
1906. Oppositifolia — Attractive foliage; pink flowers. Each 15c
1907. Oregonianum — Very rapid bright green foliage; yellow blooms; native. Each 15c
1908. Prunatum Forsterianum — Glaucous foliage that turns some red in the fall and winter. Each 20c
1909. Reflexum—Blue gray foliage; yellow flowers. Each 15c
1910. Reflexum Bronze Beauty — Bronzy foliage. Each 15c
1911. Reflexum Cristata—Odd dark green foliage with peculiar cockscomb-like crests. Each 15c
1912. Reflexum Cristaballa — A smaller form of the above. Each 15c
1913. Reflexum Gray Beauty. Each .. 15c
1914. Reptans—Very dainty. Each .. 15c
1915. Roseum—Pink caste to the foliage. Each 15c
1916. Rupestris—Very similar to Prunatum Forsterianum. Each 20c
1917. Sarmentosum—A very rapid grower with yellowish green foliage. Ea. 15c
1918. Seiboldi—A very attractive Japanese species; slow in growth. Foliage turns red in fall; pink flowers. One of the very finest. Each 25c
1919. Sexangulare—Mats of dark green; yellow flowers. Each 15c
1920. Spathulifolium—Very handsome gray spathulate foliage with a metallic red luster. Each 25c
1921. Spathulifolium Glaucum — A plain gray form. Each 25c
1922. Spectabile—18 inches. A beautiful tall form with large heads of bright pink blooms; a husky grower. Blooms in the fall. Each 20c
1923. Spectabile Brilliant—A deep red form of the above. Each 20c
1924. Spectabile Variegated—Striped foliage. Light pink blooms. Each 25c
1925. Spurium—Dark foliage; light pink blooms. Each 15c
1926. Spurium Coccineum—Dark pink. Each 20c
1927. Stoloniferum—Dark foliage; fleshy pink blooms. Each 15c

1928. *Stoloniferum* Harbinger—Blooms very early in the Spring; white flowers. Each 15c
1929. *Telphium*—Similar in growth to *Specabile*, but with smaller leaves and flowers. Each 15c
1930. *Triste*—Dark green foliage; yellow bloom. Each 15c
1931. *Veris Albus*—A dainty white flowered form. Each 20c
- Collection of any 10 *Sedums* for \$1.00

SEMPERVIVUM

The different forms of Hen and Chickens are very fine for rock gardens. They are evergreen the year around. They do not require much attention. They do like perfect drainage.

1932. *Androsaciodes*—An attractive variety with hairy dark green rosettes. Each 20c
1933. *Arachnoideum Fimbriatum*—Tiny cobwebbed rosettes. Each 25c
1934. *Arachnoideum Laggeri* — A larger form of the above. Each 25c
1935. *Brauni* — Large attractive bright green rosettes. Each 20c
1936. *Browni*—Chocolate brown rosettes. Very attractive in winter. Each 25c
1937. *Montanum* — Tiny closely crowded rosettes of bright green with red tints. Each 25c
1938. *Monstrosum*—Green rosettes with a purple tip. Each 20c
1939. *Tectorum*—Common Hen and chicken. Each 15c
1940. *Tectorum Hybridum*—Very attractive rosettes and odd pink flowers. Each 20c

SHAMROCK

1941. *Communis* — (*Trifolium Atropurpureum*)—Red purple foliage.. Each 15c

SHASTA DAISY

(*Chrysanthemum Maximum*)

1942. *May Queen*—2 feet. A very early Shasta. Each 15c
1943. *Laciniatum*—Large flowers; curled petals. Each 20c
1944. *Mrs. C. L. Bell*—48 inches. Very large pure white. Each 20c
1945. *White Lady*—A very early double. Each 20c

1946. *Diener's Shasta Seedlings*—Double. Each 35c

SIDALCEA

1947. *New Hybrids*—3 feet. Assortment of pink and rose shades. (*Baby Hollyhock*). Each 20c
1948. *Rose Queen*— Each 20c

SIEVERSIA

1949. *Ciliata* — (*Geum Tripholium*) — Odd reddish nodding flowers with attractive feathery seed pods; native. Each 25c

SILENE

1950. *Acaulis*—Moss Champion—Light green mossy mounds, with stemless pink flowers. Each 20c
1951. *Alpestre*—8 inches. Very fine pure white. Each 20c
1952. *Armeria*—White to dark pink. 2 ft. A free growing beautiful cut flower; all season. Each ..
1953. *Asterias Grandiflora* — 18 inches. Large globular crimson scarlet heads. Each 25c
1954. *Maritima*—4 inches. Glauous foliage; odd showy white blooms. Very nice for the rockery. Each 20c
1955. *Orientalis*—18 inches. Fragrant deep rose flowers; biennial. Each 15c
1956. *Schafta*—6 inches. Rosy purple; trailing habit. Each 20c

SISYRINCHIUM

1957. *Anceps*—12 inches. Deep blue flowers with a dark eye; grassy foliage. Very showy. Blooms all summer. Each 25c
1958. *Bellum*—Pink to royal purple flowers daintily carried on graceful grass like 10 inch stems. Spring and summer. Each 25c
1959. *Californicum* — 8 inches. Bright golden yellow flowers on grass-like stems, blooming over a long period of time. Each 25c
1960. *Douglasi*—Lavender pink. Each 50c
1961. *Inflatum*—Resembles *Grandiflorum* but with flowers of a lighter purple, or rosy lavender, often striped with white. Each 50c
1962. *Grandiflorum*—Grass Widow. Dainty little member of the Iris family. Clear half-open purple flowers with orange anthers hung in a partly

- drooping position. A royal beauty.
Each 25c
1963. *Iridifolium*—12 to 18 inches. Flowers buff and violet, in spike formation. Attractive foliage. Each 20c
1964. *Striatum*—Glossy bright yellow flowers striped with deeper yellow toward the center. Each 25c

SOLDENELLA

1965. *Alpina*—A high alpine plant. Requires protection from overhead wet from November to March. Makes low growing mats of round leathery leaves and fringed, funnel-shaped nodding bellies of violet on graceful stems. Each 50c

STACHYS

1966. *Lanata*—Kitten's Ears—Odd woolly white foliage for edgings. Each 15c

STATICE

All Statice make fine dried flowers used like Baby Breath.

1967. *Asiaticus*—Very rare form; flowers white with pink in the centers.
Each 50c
1968. *Dumosa*—15 inches. Large silvery white sprays. Each 20c
1969. *Latifolius*—Sea Lavender—2 feet.
Each 20c
1970. *Spathulata*—Exceedingly rare; tiny round foliage with 6 inch stems of pinkish lavender blooms. Each \$1.50
1971. *Tartarica*—White form; fine for dyeing. Each 20c

STOKESIA

1972. *Cyanea*—"Stoke's Aster"—Resembles very much the Sunshine Aster. A beautiful lavender blue. An old established plant is very beautiful. Each 20c

SWEET WILLIAM

See *Dianthus Barbatus*

SYNTHESIS

These little "Alpine Violets" are found growing right in the dense shade of the woods. They bloom very early in the spring, from February to April.

1973. *Lanuginosa* — Alpine species with gray feathery foliage and spikes of deep blue flowers. 3 to 4 inches. Each 50c

1974. *Reniformis*—Native. Small dark blue spikes of dainty flowers above a basal mass of reniform leaves. 6 inches. April and May bloomer. Each 35c
1975. *Rotundifolia*—Native shade plant, big rounded leaves, spikes of lavender or pale blue flowers. Each .. 20c
1976. *Rotundifolia Sweetseri*—Dark blue or violet form of above. 6 to 8 inches. Each 20c
1977. *Schizantha*—A deciduous species with large toothed leaves and spikes of fringed violet flowers. A rare and lovely shade. Each 50c
1978. *Stellulata* — Reniform leaves and good spikes of deep blue flowers; the most robust of all the species. Shade. Each 25c

TEUCRIUM

1979. *Chamaedrys*—Glossy green evergreen foliage and spikes of bright rose flowers from July to September. Each. 25c

THALICTRUM

1980. *Aquilegifolium*—Foliage is like the Columbine; fluffy heads of purplish flowers in May and June. 3 to 4 feet. Each 25c
1981. *Dipterocarpum* — 4 feet. Beautiful mauve flowers in large panicles; yellow anthers. A most charming cut flower. Each 25c
1982. *Glaucum*—5 feet. Large glaucous foliage; feathery yellow bloom. Each 20c
1983. *Flavum*—4 feet. Dainty cut foliage; yellow plume. Each 20c

THERMOPSIS

1984. *Caroliniana*—A fine border plant with large lupin-like flowers of bright yellow. 3 to 5 feet high. Each 20c

TIGRIDIA

1985. *Pavonia*—Tiger Flower or Shell Flower of Mexico—A bulbous plant of about the same hardiness as the Gladiolus. In mild climates they may be left in the ground, mulching with leaves or straw and soil, "After the bulbs are dormant and cold weather has set in." Their

- flowers are formed by 3 broad petals extending from a central cup, and curiously marked, from June to October. Choice of red, yellow or orange. Each 15c \$10.00 per hundred.
1986. Giant deep rose— Each 20c
1987. Blush pink— Each 25c
1988. White— Each 25c

THYMUS—Thyme

1989. Azoricus—A very beautiful trailer; bright rosy purple flowers. Each 20c
1990. Manulata—2 inches. Shiny foliage; large pink flowers. Each 25c
1991. Nitidus—8 inches. Semi-shrubby; showy light pink blooms. The foliage is extremely odiferous. Each 20c
1992. Herba-Barona—A perfectly prostrate creeper smelling strongly of Caraway. Each 25c
1993. Serpyllum—6 inches. Rapid creeper, purple flowers. Each 20c
1994. Serpyllum Albus—2 inches. Pure white trailer. Each 20c
1995. Serpyllum Argenteus — 6 inches. Beautiful silvery variegated foliage, very strongly scented; pink flowers. Each 20c
1996. Serpyllum Carneus—2 inches. Clear light pink trailer. Each 20c
1997. Serpyllum - Citrinodorous Aureus — Golden variegated foliage with a lemon odor. Each 20c
1998. Serpyllum Coccineus—Light red, 2 inches. Each 20c
1999. Serpyllum Crimson—2 inches. Very showy purple crimson flowers. Each 20c
2000. Serpyllum Lanuginosus—2 in. Woolly Thyme. Each 20c
2001. Serpyllum Purple — Semi-shrubby; purple blooms. Each 20c
- 2001C. One each of the Thymes for \$2.25

TRADESCANTIA

2002. Virginica—2 feet. Spiderwort. Odd flowers of deep blue on branching stems throughout the summer. Each 20c
2003. Virginica Roseus—Bright rose pink form of above. Each 25c

TRITOMA-KNIFOFIA
“Red-Hot Poker”

2004. Early Express—3 feet. Pokers of as-

- sorted shades of red and yellow; foliage tropical looking in appearance. Large plants. Each 35c
2005. Mirabilis—3 feet. A fine race of early flowering “Pokers” running strongly to yellow shades. Each 25c
2006. Perpetual Flowering—3 feet. Large spikes mostly in red shades. Large plants. Each 35c
2007. Tuckii, May Queen—3 feet. Yellow blooms. Each 25c
- Note: All Tritomas should be given slight protection in severe winters.

TROLLIUS

2008. Europaeus—18 to 24 inches. “Globe Flower.” The bright golden yellow flowers resemble a rose. Each 25c
2009. Europaeus Hybridus Orange Princess Large deep orange flowers. Each 25c
2010. Ledebouri—2 feet. Finest double orange. Each 35c

TUNICA

2011. Saxifraga—8 inches. Masses of single light pink blooms all summer. Very fine for the rock garden. Each .. 15c
- * * * * *
- * 2012. Safifraga Fl. Pl.—Double Flow- *
* ering which is very superior to the *
* other.. It has fine foliage and masses *
* of large double pink blooms which re- *
* semble little roses. Very beautiful. *
* Each 25c *
* * * * *

UROSPERMUM

2013. Delchampi—Large yellow flowers similar to a dandelion, with a black spot in the center. Very effective on an old plant. Each 20c

VALERIANA

2014. Alba—White Valerian. Each 15c
2015. Officinalis—3 to 4 feet. The old-fashioned Garden Heliotrope. Very sweet smelling. Each 20c
2016. Pretty Betsy—18 inches. Assorted pink and red shades. Each 20c
2017. Rubra—2 to 3 feet. Fine showy light red. Each 20c

VERBASCUM

2018. Phoenicium—2 feet. Very attractive border plant of various shades, including white, pink, salmon, and violet, in graceful spikes. Each 20c

VERONICA

2019. Alpina—3 inches. Rapid creeper with very light blue flowers. Each .. 20c
2020. Cuppressoides Nana—6 inches. A dainty very tiny semi-glaucous shrub. Each 35c
2021. Glauca—A semi-prostrate shrub; with glaucous foliage and pretty white flowers. Very fine. Each 35c
2022. Glomerata—15 inches. Grossy green foliage; spikes of light blue flowers. Each 15c
2023. Pectinata Rosea—1 inch. A fast growing creeper with gray foliage; and small pink flowers. Each 15c
2024. Prostrata—6 inches. Very early bright blue. Each 20c
2025. Rupestris—8 inch. Vivid blue. Ea. 20c
2026. Spicata—3 feet. Spikes of clear blue flowers; fine for cutting. Each 20c
2027. Spicata Rosea—15 inches. Clear deep rose; fine for the rockery. Each 25c
2028. Teucrium—15 inches. Royal blue. Very showy. Each 20c

VERBENA

2029. Aubletia—Hardy perennial creeping plant in bloom all summer. Flowers colored violet and carmine. Fine for covering dry banks for bedding, borders and rockeries. Each 20c
2030. Venosa—Blooms all summer, with rich rosy purple flowers. Each 20c
3 for 50c
2031. Venosa Lilacina—Lilac flowers. 20c
- 2031C. One each of the Verbenas for 45c
For bedding purposes, \$1.75 a dozen

VINCA

2032. Variegata—Fine trailer for window boxes, or over banks. Blue flowers. Each 20c

VIOLAS

2033. Alpina—Small flower dark purple. Each 20c
2034. Apricot Queen 15c
2035. Arkwright Ruby—Bright glowing ruby red. Each 20c
2036. Ascalon Hybrids. Each 20c
2037. Ascalon Jewel—A real gem; very early and continuous; large deep lavender blue fading to light lavender blue; thus giving it a two-toned effect. Each 25c

2038. Black Knight—A large flowered English variety. Each 20c
2039. Black Prince—Large. Each 15c
2040. Blue Danty—Early. Each 15c
2041. Blue Perfection—Exceptionally early and continuous. Each 15c
2042. Bosniaca, Rose Queen—Tiny bright pink. Each 20c
2043. Brandywine—Purple and white flowers; very effective. Each 20c
2044. Dark Betty—A late blooming type with pure dark blue flowers. Ea. 15c
2045. Empress—A beautiful large flowered pinkish lavender. Free flowering. Each 20c
2046. Enchantress—The nearest to pink Viola that we have. Early. Each 15c
2047. Eureka—Dark blue. Each 15c
2048. Fleur D'or—Rich yellow. Each .. 15c
2049. Illona—Seedlings. Extra large flowers of rich wine purple. Each .. 25c
2050. Jersey Gem—The ever popular favorite for bedding. Blooms all summer. Each 15c, doz. \$1.25
2051. Jersey Jewel—Darker and large form of the above. Each 15c
2052. Jersey White. Each 15c
2053. La Singulare—Very odd mauve pink flowers. Each 20c
2054. Lavender Gem. Each 20c
2055. Lighty Betty—A very pretty bluish white. Each 20c
2056. Lord Nelson—Dark purple. Each 15c
2057. Lutea—Yellow; should be sheared back very frequently. Each ... 15c
2058. Maggie Mott—A good English variety that is a perfect soft lavender of delicate fragrance. The flowers are extra large. A fine type for bedding. Each 25c
2059. Marjorie—Large sweet scented blue and white. Each 20c
2060. Mary Emma—Large clear pure yellow; the very finest yellow. Each 25c
2061. Mrs. C. P. Malmo—Another fine yellow, that is similar to Mary Emma, but is lighter yellow. Each 25c
2062. Nigra—The Black Imp. Each .. 15c
2063. Orchid Prince—Each 15c
2064. Papilio—Small blue and white. 15c
2065. Peacock—Large blue and white. 15c
2066. Planet—Large dark blue. Each 15c
2067. Portland Gem—A very persistent bloomer; lavender blue with a small yellow eye. Each 25c
2068. Pride of Seattle—Large purple and

- white flowers. Each 15c
2069. Purple Knight—Large very showy early rich purple flowers. Each 15c
2070. Purple Majesty—Large flowered type. Each 15c
2071. Puck—Yellow with upper part purple. Each 20c
2072. Radio—Large flowered light lavender. Each 20c
2073. Wedgewood—Very large flowers of glowing violet.
2074. White Gem—Each 15c
2075. White Queen—Each 15c
- One dozen 15c Violas for \$1.25
- One dozen 20c Violas for \$1.75

VIOLA

2076. Fletti—One of the most rare of our native Violas. Small leaves which turn a bronzy color in full sun. Flowers a bluish rose, spring and fall. Each 50c

VIOLA ODORATA

Violas

2077. Blue—Each 15c
2078. Peacock—Blue and white. Each 15c
2079. White—Each 20c
2080. Nana Blue—Very tiny, foliage and flowers. Each 20c
2081. Nana Rose—Each 20c
2082. Double Russian—Each 20c
2083. Rosina—A deep rose flowering violet with rich fragrance. Each .. 25c
2083. Yellow—Each 20c

VIOLA

2085. Pedata—Bird's Foot Violet—The foliage resembles a bird's foot. Very attractive blue and white flowers that bloom very profusely. Each .. 20c
2086. Papilionaceae—The Butterfly Violet Flowers of deep purple are produced in profusion. Each 35c

UNIOLA

2087. Latifolia—A very tiny form of Briza Maxima. A grass for drying. 25c

WAHLENBERGIA

2088. Dalmatica—Very dwarf with lavender violet cup-like flowers. Each 75c

WALLFLOWER

It is best to buy Wallflowers in the fall, so that they may be established for early

spring blooming. Our Wallflowers are bought from Sutton's.

2088. Blood Red
2089. Cloth of Gold
2090. Darkest of All
2091. Giant Pink
2092. Improved Double Assorted
2093. Improved Dwarf Double Assorted
- Any of the Wallflowers, each .. 20c
- Dozen \$1.75

XEROPHYLLUM

2094. Tenax—"Turkey's Beard or Bear Grass." Grassy foliage and huge plumes of white bloom. 3 to 4 feet. Each 50c and \$1.00

YUCCA

2095. Aloeifolia Variegata—Unusually attractive sword shaped leaves; golden variegation. Each 35c and 50c
2096. Filamentosa—Handsome species; huge spikes of cream colored blooms. Each 25c and 35c
2097. Glauca Angustifolia—2 feet. Dwarf. Each 25c
2098. Whipplei—Narrow leaf Yucca. 35c

ZAUSCHNERIA

2099. Californica—An excellent prostrate plant for rock walls, where it receives full sun. Grey downy foliage smothered from September to November with long tubular flowers similar to the Fuschia or a brilliant scarlet. Each 35c
2100. Latifolia—Of more upright habit, the flower stalks ascending from 12 to 18 inches before bending over; bright green foliage and more floriferous. Each 40c

The following items are some that we acquired too late to be put into the main body of the catalog. They are all worthy of mention.

2101. Anchusa Angustifolia—Graceful narrow leaves with three foot spikes of sky blue. Blooms in early summer. Each 25c
2102. Aquilegia Pyrenacea—Dwarf Columbine. Foliage is small, neat and lacy. Flowers large rich blue, with a contrasting central tassel of gold.

- 6 to 8 inches. Blooms in June and July. Each 25c
2103. *Arisaema Japonica*—A form of Jack-in-the-Pulpit. The foliage is striped white. Each 25c
2104. *Aster Baby's Breath*—Late summer flowering type with myriads of small pure white flowers. A fine bouquet filler. Each 25c
2105. *Chrysanthemum Enchantress*—Splendid, large, semi-double blooms of a clear soft rose which is always greatly admired. Each 25c
2106. *Chrysanthemum Spider Yellow* — Large flowered rich yellow. Each 25c
2107. *Chrysanthemum Stanley Van*—Large flowered clear pink. Each 25c
2108. *Eranthis Hyemalis*—"Winter Aconite" Shiny rosettes of bright green foliage, and golden yellow blooms, long before the Crocus season. Each 15c
2109. *Erythrea Diffusa*—Pink Gentian. A neat brilliant free flowering little plant bearing a profusion of waxy rose-pink stars in late summer. Each 35c
2110. *Euphorbia Myrsinites* — Prostrate evergreen with blue-green foliage and yellow flowers in early spring. Each 35c
2111. *Gentiana Acaulis Clusi*—Similar to *G. Acaulis*, but flowers are longer, on longer stems. Each 35c, 50c, 75c
2112. *Gentiana Purdomi*—A beautiful species from Tibet. Narrow, dark green leaves and large trumpets of bright blue, on long trailing stems. August to October. Each 50c and 75c
2113. *Geum Borisi*—Neat plants of evergreen foliage, with many branching 8 to 12 inch stems, covered with large vivid orange-scarlet flowers from May to October. Each 35c, 50c
2114. *Helleborus Niger Altifolius* — The Christmas Rose, although in warm climates it commences to bloom in November, and continues through the winter. Large palmately divided leaves, standing upright, make a

- fine foil for the large open white flowers, sometimes flushed pink, which are on 12 inch stems. Flowering size plants, each \$1.00
2115. *Helleborus Niger Fraecox*—Of more dwarf habit, the leaves hugging the ground, with the flowers, open sometimes flushed pink. Flowering size plants, each \$1.00
2116. *Helleborus Orientalis Hybrids*—The Lenten-Rose—Called so on account of its flowering period being February and March, the time of Lent. Erect growing, 12 to 18 inches, with very large divided leaves. The large flowers on strong stiff stems come in a wide range of colors, white, pink, maroon, some with purplish or crimson dots. Being of hybrid origin it is impossible to tell the color of two year old plants as they do not bloom until the third year. 2 yr. old plants, each 35c, 50c

IRIS GERMAN

2117. *Cleo*—A variety worth having. Each 15c
2118. *Orange Queen*—Dwarf Iris — Deep orange yellow. Each 25c
2119. *Prairie Gold*—Deepest yellow in existence. Each 25c
2120. *Puck*—Dwarf rich dark red. 6 in. Each 50c
2121. *Rose Unique*—Scented early deep rose. Each 25c
2122. *White Gold* — Satiny white, gold beard. Each 25c
2123. *Meconopsis Baileyi*—The lovely Blue Poppy of Tibet. Must have good drainage. The intense sky-blue flowers bloom from May to July 2 to 4 feet. Each 35c and 50c
2124. *Morisia Monanthos*—A charming little Crucifer. It has bright golden yellow flowers, each by itself on one or two inch stems, from early spring to late summer. Very choice and rare. Each 75c

Delphinium

Van's Exquisite Super Giants

SEED: Taken from plants whose PAR-
ENTS have been carefully selected and
HAND POLLENIZED for from two to
five generations. (To clarify this state-
ment so it will not be misunderstood—
this does not mean that this seed is di-
rect result of hand pollenization, but the
parents of the selected plants have been
hand crossed as stated above.

This method of careful selection and
hand crossing results in a very large
percentage of remarkable show Delphin-
iums. Our test gardens show that you
may expect over 75% double or semi-
double flowers, instead of the very small
percentage obtained from seed where pre-
vious generations have been open pollen-
ized in the ordinary way.

Naturally we selected only the very

finest of sturdy plants with well formed spikes of good length and with very large well arranged florets. No expense or trouble has been spared to make this the finest strain possible.

WHITE AND OPALESCENT PEARL SHADES: The whites are pure white of good substance, on excellent spikes. Florets measure from $2\frac{1}{4}$ " to $2\frac{3}{4}$ " in diameter. Some are without bees, other with white, yellow, yellow fawn or black bees. Height 4 to 7 feet.

The opalescent pearl shades are of a soft delicate lilac pearl shade, some tinted white. Seed of these will come mostly true to the parent color but you will get some thrills in other shades from this see. Only a limited amount of this seed.

2151. Packet of about 150 seeds ... \$2.00

2152. Small seedlings of the above for Spring delivery. 6 for \$1.75; \$3.00 per dozen; \$20.00 per 100.

2153. Large plants of the above guaranteed true to color and double.
Each \$2.00 to \$5.00

PINK SHADES: While these flowers will not be a genuine red pink, you will get some flowers much pinker than the ordinary light mauve and orchid tones. This group has been selected from the best pinks for five generations. Height, 5 to 7 feet. Excellent spikes, well arranged florets $2\frac{1}{4}$ " to 3" in diameter. Only a limited amount of this seed.

2154. Packet of about 150 seeds \$2.00

2155. Small seedlings for Spring delivery.
6 for \$1.75; \$3.00 a dozen.

2156. Large plants, each.. \$4.00 and \$5.00

LIGHT SHADES: This group includes the mixed shades in beautiful pastel tones of sky blue, light mauve, delicate lavender and orchid tones. Some Selfs in this mixture. Double and semi-double flowers

$2\frac{1}{2}$ " to 3" across with various shades of bees and in some cases very double without bees.

2157. Packet of about 150 seeds \$1.50

2158. Small seedlings for Spring delivery.
6 for \$1.50; 12 for \$2.50; \$15.00 per 100.

2159. Large plants, full double and semi-double, each \$1.00 to \$5.00

DARK SHADES: In this group are included the brilliant rich blue and purple in varying shades of each color. Some of these purples are tinted fiery red. $2\frac{1}{2}$ " to 3" flowers double and semi-double with black, brown and white bees and rarely with the bee absent.

2160. Packet of about 150 seeds \$1.50

2161. Small seedlings for Spring delivery.
6 for \$1.50; 12 for \$2.50; \$12.00 per 100.

2162. Large plants, each .. \$1.00 to \$5.00

BLUES, We have a limited amount of seed from some blues, which is a color much sought after at the present time. These flowers have not been brought to the same stage of perfection as the others listed in this group, being somewhat smaller and producing not quite as high a percentage of doubles and semi-doubles. However, you will get some very beautiful spikes in a wide variety of shades of this lovely color.

2163. Packet of about 150 seeds \$2.00

2164. Small seedlings for Spring delivery.
6 for \$1.75; \$3.00 per dozen.

No large plants for sale at present.

2165. Giant Pansies—Mixed. Dozen .. 45c
Per 100 \$3.00

2166. Bellis Perennis — Double English Daisies. Pink, red or white.
Dozen 60c; per 100 \$5.00

Vines and Climbers

BITTERSWEET

Celastrus scandens. Crimson berries all winter.

2359. 3 year. Each 75c

2360. 2 year. Each 50c

CLEMATIS

Anemone. *Clematis Montana*. Pink flowers in April.

2361. A year. Each 75c

Jackmani. Large purple blossoms in summer.

2362. 3 year. Each \$1.50

2363. 2 year. Each \$1.00

Sweet Autumn. *Clematis paniculata*. Fragrant white blossoms.

2364. 3 year. Each \$1.00

2365. 2 year. Each 75c

CREEPER

Engelmann. *Ampelopsis quinquefolia engelmanni*.

2366. 3 year. Each 75c

2367. 2 year. Each 50c

Boston Ivy. *Ampelopsis tricuspidata* (Veitchii). Fine for brick or stone buildings

2368. 3 year. Each 75c

2369. 2 year 50c

Virginia. *Ampelopsis quinquefolia*.

2370. 3 year. Each 75c

2371. 2 year. Each 50c

DUTCHMAN'S PIPE

Artistolochia siphon. Large leaf. Flowers resemble a pipe.

2372. 3 year. Each \$1.00

2373. 2 year. Each 75c

HONEYSUCKLE

Belgian. *Lonicera belgica*. Fragrant red and yellow all summer.

2374. 3 year. Each 75c

2375. 2 year. Each 50c

Halls Japan. *Lonicera japonica halliana*. Fragrant white flowers. June to November.

2376. 3 year. Each 75c

2377. 2 year. Each 30c

IVY

English. *Hedera helix*. Evergreen. Glossy foliage.

2378. 2 year. Each 50c

JASMINE

White. *Jasminum officinale*. Good climber. Fragrant.

2379. 3 year. Each \$1.00

2380. 2 year. Each 75c

Winter (yellow), *Jasminum nudiflorum*. Blooms very early.

2381. 3 year. Each 75c

2382. 2 year. Each 60c

SILVER LACE VINE

Polygonum auberti. Rapid grower, white blossom.

2383. 3 year. Each 75c

2384. 2 year. Each 60c

TRUMPET CREEPER

Bignonia radicans. Orange blossoms in July.

2385. 3 year. Each 75c

2386. 2 year. Each 60c

WISTERIA

Chinese Purple. *Wisteria sinensis*.

2387. 3 year, seedlings. Each 75c

2388. 2 year, seedlings, Each 60c

Longcluster. Purple. *Wisteria multijuga*.

2389. 3 year, grafted; a great improvement over seedlings. Each \$1.50

2390. 2 year, grafted; purple and pink. Each \$1.00

For Cut Flower or Bedding, Pentstemon Southgate Gem Is Unexcelled.

Miscellaneous Shrubs, Trees, Etc.

2391. Mountain Ash. Each 25c
 2392. Azalea Mollis. Each....35c and 550c
 2393. Bamboo. Each25c and 50c
 2394. Birch—White European. 25c and 50c
 2395. Boxwood Dwarf. Each 25c and 50c
 2396. Boxwood Golden. Each 25c and 50c
 2397. Boxwood English. Each 25c and 50c
 2398. Broom—red and yellow flowers. 25c
 2399. Bruckenthalia Spiculifolia — Small, heathlike plant with pink flowers in June, 6 to 8 inch. 50c and \$1.00
 2400. Buddlea—Butterfly Bush. Each 25c
 2401. Cinnamon Vine. Each..... 25c
 2402. Cornus Nuttali—Flowering Dogwood. Each25c and 50c
 2403. Cotoneaster Horizontalis. 25c and 50c
 2404. Cotoneaster Humifusa. Each 25c
 2405. Cotoneaster Macrophylla. Each 25c
 2406. Elm Chinese. Each25c and 50c
 2407. Euvonymous Red Twig. 25c and 50c
 2408. Euvonymous Rosemaryifolius. Each 25c and 50c
 2409. Heather Carnea. Each 25c and 50c
 2410. Heather Copperea. Each 25c and 50c
 2411. Heather Mediterranean Hybrids. Each25c and 50c
 2412. Heather Stricta. Each 25c and 50c
 2413. Heather Vulgaris—Lavender or white. Each 25c and 50c
 2414. Horse Chestnut. Each 50c and 75c
 2415. Hydrangea Hills of Snow.25c & 50c
 2416. Hydrangea—Blue or pink. 25c & 50c
 2417. Juniper Sabina. Each 25c and 50c
 2418. Juniper Tamaraxfolia. 25c and 50c
 2419. Kerria Japonica. Each25c
 2420. Kolkwitzia Amabilis—Beauty Bush. Each25c and 50c
 2421. Lavendula Atro—purpura Nana — Dwarf French Lavender, 6 to 10 inches. Silvery gray foliage, with tiny spikes of rich purplish-blue glowers in dense heads. Each 35c
 2422. Laurel—English. Each 25c and 50c
 2423. Laurel—Portuguese. Each50c
 2424. Lombrady Poplar. Each 25c and 50c
 2425. Lonicera Nitida. Each25c
 2426. Matrimony Vine. Each20c
 2427. Menziesia Pollifolia. Each35c
 2428. Privet—Golden. Each25c
 2429. Pyracantha—red or orange berried. Each 25c and 50c
 2430. Salix Babylonica—Weeping Willow. Green or golden. Each 35c and 50c
 2431. Skimmia Japonica—Evergreen foliage; rich scarlet berries. 25c and 50c
 2432. Symphorocarpus—pink or white berried. Each 25c
 2433. Weigelia Rosea. Each 25c
 2434. Yew English. Each 25c and 50c

Gardening Accessories

COLE'S SHRUB COMPOST

This is something entirely new in Garden Composts and is specially recommended for Rhododendrons. Rhododendrons treated with the new material produce leaves as large as the largest English Laurel leaves with corresponding vigor in growth. While stimulating growth it does not lower the flowering habit, as this is improved, too. First made specially for Rhododendrons and other ericaceous plants, it has been found equally effective on all forms of shrub growth.

2596. ½ Bushel .. 95c 1 Bushel .. \$1.75

COLE'S SLUGITE

There are a great many slug poisons on the market, but the slugs refuse to eat them when there is more likeable food available. COLE'S SLUGITE does not at-

tempt to poison slugs. It is a stainless, non-poisonous liquid which is sprayed on the plants. Slugs will not come near the plants sprayed with this solution. Double strength, mixed with clay to form a soft putty and then used as a ring around Dahlias, etc., it will prevent slugs coming near them throughout the season.

2597. 2 Pounds 50c

COLE'S LAWN WEEDKILLER

This is a combination of Chemicals so carefully blended that it will kill all lawn weeds without injuring the grasses. Pearlwort, chickweed and other troublesome lawn pests, especially moss, are instantly killed by this weedkiller while the intermingling grasses are stimulated and improved.

2598. 2 Pounds 40c

COLE'S GARDENERS' SOAP

Unlike the usual mechanics' hand soap, this is not a mixture of stock yard wastes and lye, but is composed entirely from Vegetable Oils. It will instantly clean the roughest hands and make them soft. Being composed of saponified vegetable oils entirely it does not injure the tenderest skin.

2599. 50c

COLE'S LAWN COMPOST

This is something new in the way of grass treatment. It is bacterially treated vegetable matter which gives lasting results on the lawn.. It produces a rich, full turf, does not burn, and as it contains no mineral compounds it leaves no injurious residues in the soil. One light dressing a season will maintain a rich deep green turf. Owing to its bacterial content its action is slow and continuous and is not thus lost with the first cutting as with so many grass foods, which give up all their food as soon as applied, with a consequent loss of much of it before the plant needs it.

2600. ½ Bushel .. 95c 1 Bushel .. \$1.75

COLE'S FUNGICIDE

This Fungicide will not stain either the plant or paint.. There are many effective Fungicides for mildew, etc., but most of them either burn or stain and are thus ruled out except in commercial practice, such as orchard spraying.. COLE'S FUNGICIDE kills and prevents most forms of fungi which attack plants, from the microscopic damping off fungus in the seed flats to the mildew on Roses.. It will prevent rusts on Snaps and Hollyhocks. It will kill and prevent the mealy mildews on Delphiniums, Phlox, Lupines, etc, The destructive brown spot on creeping bent lawns is easily controlled by COLE'S FUNGICIDE.

2601. ½ Pint 65c 1 Pint 90c

COLE'S PLANT STIMULANT

This is purely a stimulant and cannot take the place of fertilizer. It is a most effective way to "buck up" plants that

are slow to move into growth, especially seedlings in the spring. All pot plants show an immediate response when used at the rate of a tablespoon to the gallon of water.

2602. ½ Pint 60c 1 Pint 90c

COLE'S PLANT COMPOST

Almost without exception the "plant foods" have either a Sulphate of Ammonia or Nitrate of Soda as a base for their Nitrogen content. This renders them very liable to cause burning, and both ingredients leave objectionable plant poisons as residue in the soil. COLE'S PLANT COMPOST does not burn or leave a poisonous residue. The plant foods are combined with specially prepared carbons which have it is formed. Ammonia not used by the the power of conserving the Ammonia as plants at once is absorbed by the carbons and held until they need it. Each grain of this special carbon is capable of instantly absorbing several hundred times its own volume of Ammonia and holding it in readiness for the plant's use.

2603. ½ Bushel .. 95c 1 Bushel .. \$1.75

COLE'S APHISIDE

Undoubtedly the most effective Aphisides are made from Nicotine, but they are deadly poison and as such cannot be safely used on plants that are to be eaten. The poison is also readily absorbed through the skin when spraying. Effective non-poisonous aphisides are made from various extracts of Pyrethrum flowers, but these have the disadvantage of being unstable as they are readily decomposed on being exposed to light. COLE'S APHISIDE is a non-poisonous spray which does not contain the unstable pyrethrum extract as its active matter, it is made entirely from plant oils and is neither affected by heat nor light. Used at the ratio of two table-spoons to the gallon of water it quickly destroys most forms of sucking insects and plant mites. Being made entirely from emulsified vegetable oils, it spreads on the most glaucous surfaces; even cabbage leaves will wet instantly.

2604. ½ Pint 65c 1 Pint 90c

COLITE

This is an effective spray for Rose Aphis, Bean Aphis, Cabbage Aphis, Apple Aphis, White Fly, Thrip Mites and Red Spider. 1 tsp. of Colite to a gallon of water. Cypress Worm, Tent Caterpillar, Willow Worm, Poplar Worm, Rose Worm, Currant Worm, Pear and Hawthorne Worm. A

perfect vermin wash for dogs.

2605. 2 oz. Jar .. 45c 4 oz. Jar .. 75c

SLUGSTOP

Slugite mixed with clay so that it can be placed around the plant.

2606. 3 Pound Bag 50c

A NEW ADDITION**SCHIZOSTYLIS, Mrs. Hegarty**

An excellent late flowering bulbous plant, with a profusion of satiny pink flowers, on 12 to 18 inch stems, from August to November. Fine for cutting. They like a deep loam or peaty soil, not too dry, with a little protection from cold in very cold climates. Each 35c
